120/240 V or 120/208 V single phase (three wire) AC, 60 Hz

The short circuit rating of this panel is 10000 RMS symmetrical amperes.

⚠ WARNING Risk of Fire or Electric Shock

- Disconnect power at the circuit breaker(s) or disconnect switch(es) before installing or servicing.
- Installation and/or wiring must be in accordance with National Electrical Code (Article 680)/Canadian Electrical Code (Section 68) and local electrical code requirements and is subject to approval by the local inspection authority.
- Use #14 - #6 AWG COPPER CONDUCTORS ONLY, rated 75° C min., for branch circuit and #14 - #2 AWG for main lugs and neutral main.
- For outdoor locations or wet locations (rain-tight), conduit hubs that comply with requirements of the UL514B (standard for fittings for conduit and outlet boxes) are to be used.
- Install only LISTED receptacle(s) and/or wiring device(s) inside the enclosure.
- The control panel is to be a minimum of 3m (in Canada) or 5ft (in USA) from the inside wall of the pool, spa, or pond, unless separated from the body of water by a fence, wall or other permanent barrier that will make it unaccessible to persons in the water.
- If this enclosure is used for direct conduit connection to a wet-niche or no-niche luminaire, one of the connection kits listed below in NOTE 6 must be used.
- When panel is outdoors, a LISTED rainproof cover must be installed over the wiring device in the side knockout.
- This control should not be connected to any equipment which would cause bodily injury or property damage should it be activated unexpectedly.
- Follow circuit breaker manufacturer's installation instructions.
- Do not connect two or more power supplies in parallel.
- Replace front panel covering terminals before powering ON.
- KEEP DOOR CLOSED AT ALL TIMES when not servicing.

⚠ AVERTISSEMENT Risque d'incendie ou d'électrocution

- L'installation et le câblage doivent être réalisés conformément au Code national de l'électricité (article 680)/Code canadien de l'électricité (section 68) et aux exigences des normes électriques régionales et sont soumis à l'approbation de l'organisme de contrôle local.
- Utiliser UNIQUEMENT des conducteurs en CUIVRE de 14 à 6 AWG, évalués à 75° C min, pour le circuit de dérivation et de 14 à 2 AWG pour les cosses principales et le fil neutre.
- Pour les emplacements extérieurs ou les endroits humides (étanches à la pluie), utiliser des entrées de conduits conformes aux exigences de la norme UL514B pour les pièces de fixation pour conduits et boîtes de sortie.
- Le panneau de commande doit se trouver à au moins 3 m (au Canada) ou 5 pi (aux États-Unis) de la paroi interne de la piscine, du spa ou de l'étang, à moins qu'il ne soit séparé du plan d'eau par une clôture, un mur ou toute autre barrière permanente rendant l'unité inaccessible aux personnes se trouvant dans l'eau.
- Si ce boîtier est utilisé pour le raccordement direct d'un conduit à un luminaire avec niche immergée ou sans niche, l'une des troupes de raccordement indiquées ci-dessous à la REMARQUE 6 doit être utilisée.
