# Eaton 93E UPS

80 - 400 kVA

## **Applications:**

- Data centre
- Telecom
- Manufacturing
- Healthcare

## **Double conversion UPS**

Double conversion provides the highest level of protection available by isolating the output power from all input anomalies.

#### **Energy-efficient design**

With a transformer-free design and sophisticated sensing and control circuitry the 93E is capable of achieving up to a 98.5% efficiency rating, making it one of the most energy-efficient UPSs in its class - and it still provides maximum load protection. Unlike most high efficiency UPSs, the 93E:

- Provides surge suppression for the load
- Detects the location of faults (utility or load) and takes the appropriate action
- Switches to double-conversion operation in less than 4ms

High system efficiency reduces utility cost, extends battery run times and ensures cooler operating conditions.

The Eaton® 93E UPS delivers superior power protection for ever-expanding loads in today's space-constrained data centres.

Facilitating a lower total cost of ownership (TCO) through a combination of energy-efficiency, high reliability and a compact footprint the 93E is an ideal solution for small - to medium - sized data centres and other applications desiring highly reliable power protection.

## Real compatibility

Active power factor correction (PFC) provides 0.99 input power factor and <5% ITHD, thus eliminating interference with other critical equipment in the same network and enhancing compatibility with generators. The 93E is optimised for protecting modern 0.9 p.f. rated IT equipment without the need to oversize.

## **True reliability**

Patented Eaton Hot Sync® technology makes it possible to parallel up to four UPSs to increase availability or add capacity. The technology enables load sharing without any communication line, thus eliminating single point of failure.

#### Compact & serviceable design

Small footprint occupies minimal floor space:

- Up to 30% smaller than similar competitive solutions
- Allows dedication of more floor space to revenue producing equipment

The 93E is easily and quickly serviced to provide the highest level of availability with Mean Time to Repair (MTTR) < 30 minutes

#### **User Interface**

Large LCD graphically displays UPS status and offers easy access to measurements, controls and settings.

## Connectivity

With Eaton® Mini-Slot connectivity cards, you can monitor, manage and remotely shutdown UPSs across the network.

- Network Card-MS Web/SNMP Card allows you to connect your 93E UPS directly to the Ethernet network and the Internet.
- Network and MODBUS Card-MS provides remote monitoring of a UPS system through a Building Management System (BMS) or Industrial Automation System (IAS).
- Relay Card-MS provides an RS232 port and the dry-contact interface between your Eaton UPS and any relay-connected computer.
- Industrial Relay Card-MS provides a hard-wired dry-contact relay interface for industrial applications

#### **Software**

Eaton's Intelligent Power® Software Suite incorporates two important applications for ensuring quality power and uptime: monitoring and management of power devices across the network combined with automatic, graceful shutdown when faced with an extended power outage.

#### **TECHNICAL SPECIFICATIONS<sup>1</sup>**

Power	
Ratings	80kVA/72kW, 100kVA/90kW, 120kVA/108kW,
	160kVA/144kW, 200kVA/180kW,
	300kVA/270kW, 400kVA/360kW
Topology	Double-conversion online UPS
Electrical Input	400/230V, 4 wire (380/415V selectable)
Input Voltage Range	-15%, +20% from nominal (400V) at 100% load without depleting battery
Operating Frequency	50/60 Hz (40 to 72 Hz)
Input Power Factor	>0.99 typical
Input Current Distortion	≤5% THD
Electrical output	
Nominal Output Voltage	400/230, 4 wire (380/415V selectable)
Output Voltage Regulation	±1% Static; ±5% dynamic at 100% resistive load change, <20 ms response time
Battery	
Battery	216/240 Cells (Selectable)
Charging Method	ABM Cyclic Charging
General	
Efficiency	Up to 98.5% High-efficiency mode Up to 94% Double-conversion mode
UPS Bypass	Automatic on overload or UPS failure
Dimensions W x D x H	600 x 800 x 1876 (mm) 80-200kVA 1600 x 820 x 1880 (mm) 300/400kVA
Cabinet rating	IP20 with standard washable dust filters
Weights	80/100 kVA - 283 kg, 120kVA - 311 kg 160/200kVA - 457 kg, 300/400kVA - 1090 kg
Overload	150% for 1 minute, 125% for 10 minutes >150% for 150ms

Communications		
Display	Graphical LCD with blue backlight	
LEDs	(4) LEDs for notice and alarm	
Audible Alarms	Yes	
Communication Ports	(1) RS-232, (1) USB, (1) EPO	
Communication Slot	(2) Mini-slot communication bays	
Environmental		
Operating Temperature	0°C to +40°C; Batteries recommended max. +25°C	
Storage Temperature	-25°C to +55°C without batteries +15°C to +25°C with batteries	
Relative Humidity	5–95%, non-condensing	
Audible Noise	80-120kVA ≤65 dBA at 1m typical 160-200kVA ≤70 dBA at 1m typical 400kVA ≤73 dBA at 1m typical	
Altitude	<1000m at +40°C	
Certifications		
EMI Standards	EN55022/EN55024	
EMC Compliance	IEC 62040-2	
Quality	ISO 9001: 2000 and ISO 14001:1996	
Accessories		
Top Cable Entry (80-200kVA	, standard on 300-400kVA)	
Maintenance Bypass Switc	hes and System Parallel Modules	
Battery Cabinets & Battery	Circuit Breakers, IP21 hood (80-200kVA)	

1. Due to continuous product improvements, specifications are subject to change without notice.
