## MELAG The Premium-Evolution series

The new benchmark for practice steam sterilizers  
Besides the typical MELAG features such as record operating times, intuitive  
operating concept, integrated documentation and approval, the steam  
sterilizers of the new Evolution series offer a range of unique innovations,  
which can only be developed in this perfection by a specialist for practice  
hygiene and instrument decontamination. The focus of the new Evolution  
series is the combination of even shorter operating times and thus faster  
instrument availability and energy savings.

It is often the small tools that allow us to be  
more proficient in the work place. With the  
diverse options of the Evolution series, it helps to  
make work processes simpler, safer and more  
efficient. These features are integrated into all  
steam sterilizers of the Evolution series and can  
be directly activated via the 200% colour touch  
screen display.

From \$14,160 Please call +61422336066 for the price

## SUTURES

Look Polysyn Absorbable Sutures. | PGA braided, synthetic absorbable. | Typically retains 50% tensile strength at 14 days  
The extraordinarily smooth, low friction proprietary coating reduces tissue drag. These synthetic absorbable sutures ensure closure through the critical wound healing period. They retain approximately 50% of their high initial strength at two weeks and 20% of their strength at three weeks.
