# INTRODUCTION

Election time is rapidly approaching here in the United States, and you are about to begin the new *Elections 2018* Unit Study Adventure. Every two years, we have national elections, and they are often accompanied by state and local elections. In 2018, the national elections are in the spotlight, while there are also many state and local elections on the ballots.

With this study, I hope that your child learns that their vote will be their voice in our government as they grow older. The freedom to vote and choose our government representatives is a freedom that has been obtained and defended at the cost of many precious lives. It is a privilege that they need to understand, and with this privilege comes the need for understanding the election process, the workings of American government and the impact that they can have on the process as well as the future of our country.

With this unit study, your students will learn about:

- History of elections
- Basic structure of representative government
- Voting and election process
- Importance of all levels of U.S. elections
- Campaign participation and opportunities
- Presidents, their families and their opponents

While some consider the congressional elections of 2018 most important, this study focuses on the U.S. congressional races, as well as historical elections, American presidents, and the importance of state and local elections.

As this new generation of Americans grows up, they need to be fully aware of their own capabilities and responsibilities within the framework of our American government. This unit study can open the doors to further learning and understanding in these areas. It will get the whole family involved in elections and politics.

We need to make sure this up and coming generation understands that the government is not like a corporation or company—some distant entity that they can't impact or change. The American government is of the people, by the people and FOR the people. It is ours to control with our votes and our voices. We, the American people ARE the government.

With this study, your child will learn about this great country through a wonderful and interesting adventure into American elections and government. They will discover exciting elections, unpredictable outcomes and discover the stories of our Presidents and their lives.

This will be a great year for the study of elections. Be a part of the process as they learn that every single vote counts. With this study, your children will learn the importance of this responsibility for all American citizens, and stay engaged in the process as a family. Dinner table conversations will be lively, and the world of electronics will pale when compared to the strategies and surprises involved in American elections. Enjoy the adventure!

Blessings,  
Amanda B.
