Amazon Floor Mounted Roller System

The Amazon Sliding Track is a high-quality floor mounted roller system developed with a concealed clip floor track to minimise the appearance of external fixings.

The Amazon system can be used in a variety of settings and situations, including creating dividers in meeting rooms. Amazon is often used in applications where structural support is not available from the ceiling above.

The sliding door system also maximises space by eliminating the 'swing space' hinge doors normally use. Amazon's floor rollers can hold doors up to 200kg and are designed for simple installation.

With strong, durable and customisable design, Amazon is a cost-effective solution in both commercial and residential settings.

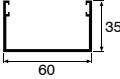

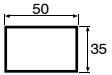

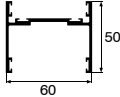

Why Choose Amazon?

- + Overtaking sliding door options
- + Simple installation
- + Unique floor track design
- + Holds doors up to 200kg

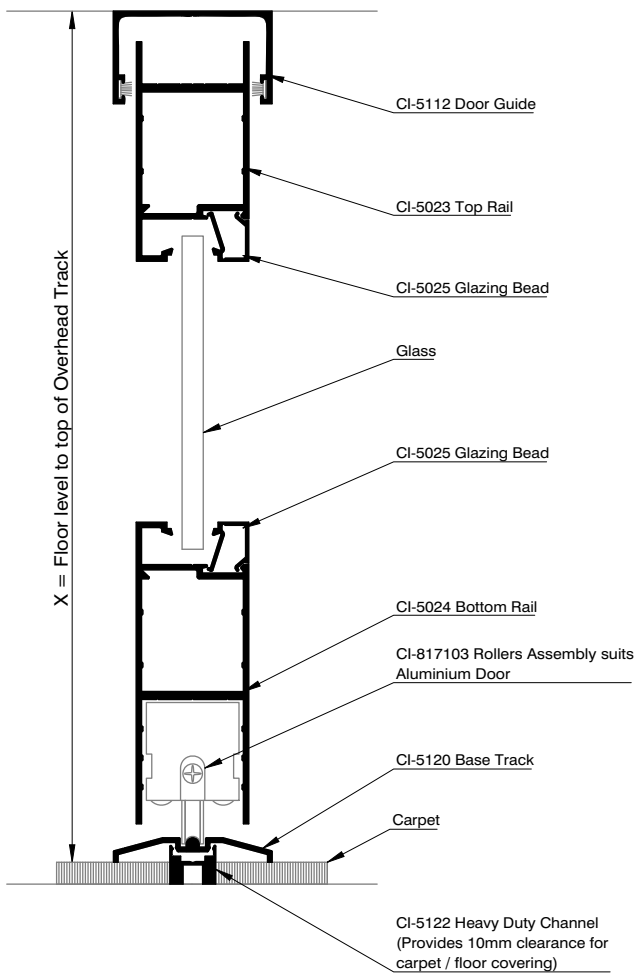

AMAZON - ANZ, SYDNEY
