EcoGuard

Radon Monitoring Service with Intelligent Detector EcoQube S

About EcoGuard

Grow your radon business by generating new revenue with Ecosense Radon Managed Service (ERMS) EcoGuard. Adding EcoGuard to your existing services helps you create an interactive service to connect with your customers by providing long-term radon monitoring. With a powerful real-time radon monitor, EcoQube S, in the hands of the homeowner, paired with real-time monitoring data, monthly reports, and your professional analysis- it's a win-win combination. Now your business has a passive revenue stream while your customers get peace of mind.

- Develop value-added service plans for your customers
- Generate new revenue through a sticky business model
- Build a long-lasting relationship with your clients
- Peace of mind for you and your customers
- Increase radon awareness in your community

Intelligent Radon Detector EcoQube S

Award-winning, Wi-Fi connected, palm-sized radon monitor. Check and monitor radon levels remotely in real-time.

- First reading in 10 minutes, reliable result within an hour
- Accurate measurement with ultra-sensitivity of 30 CPH (counts per hour)
- Compact, lightweight, easy-to-install
- Wi-Fi connected for remote monitoring
- User-friendly app provides radon level from anywhere, anytime
- Best suited monitor for easy real-time long-term monitoring
