

EcoGuard

Professional Radon Monitoring Service

Grow your radon business by generating new revenue with EcoGuard Long-Term Continuous Radon Monitoring Service.

About EcoGuard

EcoGuard service pairs multiple continuous radon monitors with a single professional dashboard. EcoGuard device provides real-time data from the deployed location you can access remotely and for any chosen length of time. It's a win-win combination: your customers get peace of mind while your business has a passive revenue stream.

EcoGuard Dashboard enables you to:

- ✓ Remotely monitor multiple locations within workplaces, dormitories, childcare centers
- ✓ Continuously verify every installed mitigation system is performing according to the warranty and service plan
- ✓ Meet ANSI-AARST SGM-SF Requirements for system Active Notification Monitoring
- ✓ Provide a long-term monitoring solution for homeowners whose short-term results fall between 2-4 pCi/L
- ✓ Receive notification when the Radon Action Level is exceeded for a prescribed time
- ✓ Email a professional 30-day report every month with a single click

Why EcoGuard:

- ✓ Develop value-added service plans
- ✓ Build a sticky business model
- ✓ Establish a long-lasting relationship with clients
- ✓ Provide peace of mind
- ✓ Increase community radon awareness
