

# 32 Piece Wall Mounted Storage

User Instructions - Please keep for future reference

ArtVer#1

## Instructions

Mount on a solid wooden base that can support the weight when the containers are fully filled.

Inspect the mounting surface to make sure that there are no hidden electrical wires, cables or pipes.

Align slots in perforated panels (Fig. 1 # 3) so that the slots holding the containers are open on the top.

Hold perforated boards against the surface on which they are to be mounted and align them with the help of a spirit level.  
Now set the mark for the 8 mounting holes.

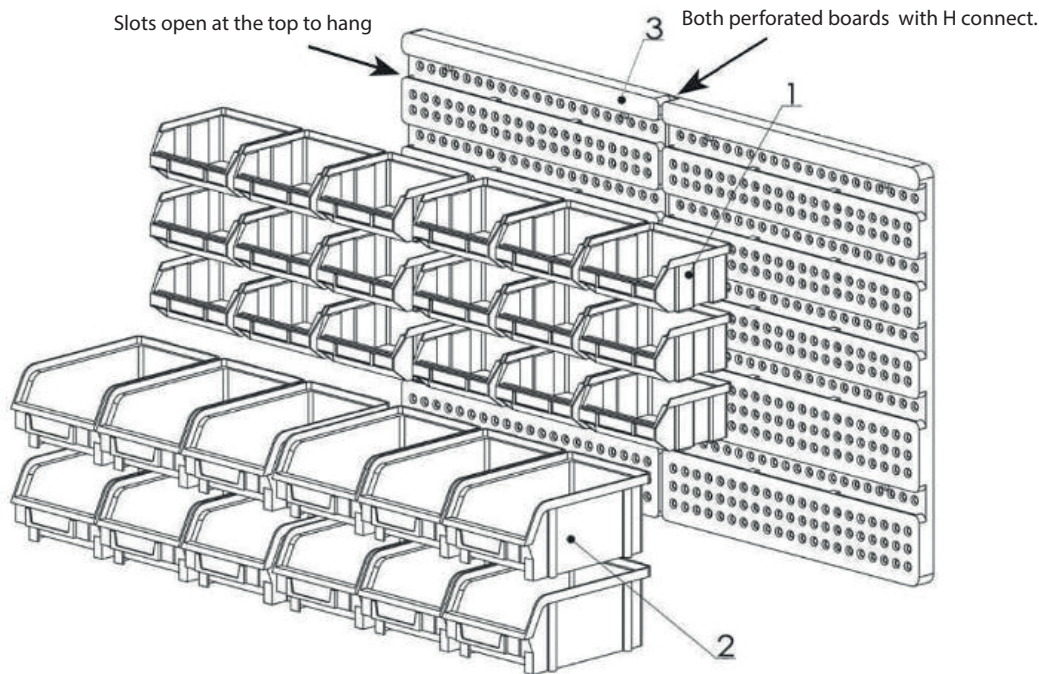

After checking the mounting surface for potential wiring etc. drill the 8 mounting holes and then mount the perforated boards to the wall.

Hang display boxes from the perforated boards by gripping the rear lip of the display boxes and slotting them into the open slot of the perforated board.  
Hang the smaller boxes from the upper 3 rows and the larger boxes in the 2 lower rows.

Part Number	Description	Number
1	Red Boxes	18
2	Black Boxes	12
3	Black Hole Boards	2
4	Screws	8
5	Wall Plugs	8

## IMPORTANT

Please wear the appropriate protective equipment during assembly as parts may have sharp edges.

Ensure wall fixings are suitable for your wall surface/type.

Do not assemble if parts are missing or do not fit correctly.

Make sure the unit is fully assembled and sturdy once assembly is complete.
