

Chair Disassembly

A small disassembly tool is included with your chair to enable you to remove the chair's legs for storage or return. Simply follow these instructions:

1. Turn your noho move chair upside down and locate the small rectangular hole on the rear of each chair leg
2. Place the tool flat against the first leg with the protruding 'nib' inserted in the rectangular hole
3. Holding the tool tight against the leg, and placing your foot on the chair for leverage, gently pull the leg and tool away from the chair.
4. Repeat for the other 3 legs.
