## Chair Disassembly

A small disassembly tool is included with your chair to enable you to remove the chair's legs for storage or return. Simply follow these instructions:

- Turn your noho move chair upside down and locate the small rectangular hole on the rear of each chair leg
- Place the tool flat against the first leg with the protruding 'nib' inserted in the rectangular hole
- Holding the tool tight against the leg, and placing your foot on the chair for leverage, gently pull the leg and tool away from the chair.
- 4. Repeat for the other 3 legs.
