

Warranty

All CONLUX Series CV1000 Bill Validators come with a Two Year Manufacturer's Warranty. Once the unit has been inspected, record the model and serial numbers from the label on the side of the bill Validator. Refer to these numbers when you call MEI, Inc. for service or information. The manufacturer's warranty is based upon the date of manufacture. Parts and labor are included for In Warranty repairs.

The first three digits of the serial number contain the manufacturing date code. (See Serial Number Configuration in this manual.) This code indicates the beginning of the warranty period. The first two digits indicate the week of manufacture; the third digit indicates the year of manufacture. For example: a bill validator with a serial number of 30290033333 was manufactured in the 30th week of 1997 (July 2012).

Configuration

The Series CV1000 is preconfigured during manufacture to accept U.S. 1.00's. The Series CV1000 can be manually configured using an option coupon or by inserting a bill of the desired denomination.

If the Series CV1000 is reprogrammed using a coupon with a different configuration, the new configuration will be the default. The coupon configuration will remain in memory even with the power off.
