## GLUCO Mini User's Manual

### How it works

#### **1- Turn on the device**

Hold the On / Off button for about 3 seconds.

#### **2- Connect to device**

Open the SYHM app.

##### **2.1 - Android/ iOS apps:**

- Open the app, select the language and then click OK.
- Click on Glucometer.
- Your device must be shown under Available Devices.
- Click on the device name.

##### **2.2 - Windows / Mac OS X apps:**

- Connect the USB bluetooth dongle to your pc.
- Open the app and click on "Add Device +"
- Your device must now appear on the list.
- Click on the device name.

#### **3- Insert the test strip**

Slide the test strip into the test strip guide.

#### **4- Send the test results to the device**

The application is now showing a notification indicating that the device is ready to receive the results.

Enter the desired value and click on the "Send" button.

#### **5- Check the test results**

Test results appear on the LCD display.

### Recharging the Battery

When the battery is low, the ON/OFF button starts flashing with the following pattern: two quick flashes followed by one long flash.

To recharge the device, plug the charge in one of the USB ports. Both USB ports can be used to recharge the device. Which one to use is up to you.

While the battery recharges, the ON/OFF button will flash constantly.

When the recharge is finished, the light on the ON /OFF button will remain ON, indicating that the battery is 100%.
