

Löwenzahn Organics Cow Stage PRE

Preparation Instructions

Please follow the preparation and dosage instructions exactly. The correct dosage ratio will always give your baby the nutrients they need. Improper preparation or storage can lead to adverse health effects due to the growth of undesirable germs. Freshly prepare each feed and feed your baby immediately. Do not reuse any excess; instead, throw it away. Always thoroughly clean the bottle, teat and ring. Always close the opened package tightly, store it in a dry place and use it within 2 weeks. Protect against heat. Store the measuring spoon clean and dry. Use only the enclosed measuring spoon for preparation. Never heat baby formula in the microwave (overheating hazard).

1. Boil fresh drinking water and let it cool down to approximately 40-50 °C / 104-122 °F.
2. Add ½ of the required amount of water to the bottle.
3. Add the amount of powder into the bottle according to the dosage table. Fill the measuring spoon and level it off.
4. Close the bottle and shake vigorously.
5. Add the remaining amount of drinking water and shake well again.
6. Check on the inside of your wrist for drinking temperature before feeding (approximately 37°C / 98.6°F)

Amounts and Dosage

The size of the bottles and the drinking quantities are guidelines and can vary individually.

| Age of the child | Per Feed | | | Bottles Per day |
|-------------------|----------------------------|-------------------|-----------------------|-----------------|
| | Boiled Drinking Water (ml) | Number of Scoops* | Prepared formula (ml) | |
| 1 - 2 weeks** | 60 | 2 | 65 | 7 - 8 |
| 3 - 4 weeks | 90 | 3 | 100 | 5 - 7 |
| 5 - 8 weeks | 120 | 4 | 130 | 5 - 6 |
| 3 - 4 months | 150 | 5 | 165 | 4 - 5 |
| 5 - 6 months*** | 180 | 6 | 200 | 4 - 5 |
| After 6 months*** | 180 | 6 | 200 | 2 - 3 |

* One full measuring spoon corresponds to 4.4g

** Only as directed by your baby's doctor

*** When feeding complementary foods at the same time. Complementary food meals replace bottle feeds
Standard solution: 13.2 g formula powder + 90 ml boiled drinking water = 100 ml of prepared baby formula

Important Notes

Löwenzahn Organics Cow Stage PRE is suitable for babies from birth as the sole source of nutrition or for supplementary feeding. Breastfeeding is the best thing for your baby. Please speak to a qualified health care professional if you would like to use infant formula. All formulas contain carbohydrates. Constant contact of teeth with liquids containing carbohydrates can cause tooth decay. That's why you should always hold the bottle yourself and not allow your baby to suck on it for prolonged periods.
