

BAG MAKING STABILIZERS AND INTERFACINGS

PELLON	VILENE	LEGACY	USE FOR:
70 Peltex™ Ultra-Firm Sew-in	S80 Heavy Sew-in	L-70 Sew-N-Shape™	Peltex is an ultra-firm stabilizer. This will make your bag very structured and it will stand up well. 71F Peltex is the most commonly used of these three products in Kaya Papaya Design bags.
71F Peltex™ I Ultra-Firm 1 Sided Fusible	Decovil 1 (original) S520 Firm Iron-on	L-71F Fuse-N-Shape™ single sided fusible	
72F Peltex™ II Ultra-Firm 2 Sided Fusible	S133 Ultra Heavy Fusible	L-72F Fuse-N-Shape™ 2 sided Fusible	
Shape-Flex™ SF101 Woven Fusible	G700/707 Woven Fusible	L-SF101 Cotton Woven Fusible	Our important interfacing. Used on all cotton fabric, even canvas, to help fabric retain its shape. Used as a “first” with other stabilizers on many applications.
520 Deco-Fuse™ Firm	S520 Firm Interlining Decovil 1 Light	L-809 Fuse-N-Shade™	Ultra thin and firm fusible stabilizer
FF78 Fusible Foam single sided	Style Vil sew-in	L-FF78 Flex-foam™	Stabilizer not as stiff as Peltex. Can be layered with other products. Bag will stand up.
808 Craft-Fuse™ 809 Décor-Bond™ wider than 808 (interchangeable products)	H250 Iron-on	L-808 Craft-Fuse™	Iron-on stabilizer for crisp hand and body. Use for card slots, reinforcing snaps and connectors. Not typically used for body of bag.
987F Fusible Fleece	H630 Iron-on Volume Fleece	L-987F Fusible Fleece	Iron-on used as stabilizer. Adds low-loft and slightly slouchy structure. Can layer with SF101.
