

Avalow Garden Systems

Each Avalow comes with a proprietary irrigation system. All you have to do is fill the Reservoir with clean water, and your plants will start to water themselves!

We use long-lasting natural materials proven in hydroponic farming to create a system that allows the soil to maintain the perfect level of hydration that creates a healthy ecosystem for your plants to thrive.

The system uses wicking with natural materials to draw water up from the Reservoir and into the soil.

This not only saves water by virtually eliminating evaporative losses, but makes for faster growing and lusher, healthier plants!

As a bonus, you will have virtually no weeds, healthier soil, less pest activity, and no hardware maintenance for a minimum of 5 years.

Benefits

- ① **Easy** - no more worrying about if your plants have enough (or too much) water allows you to focus on getting the most out of your plants when you have the time to enjoy your garden.
- ② **Place Anywhere** - our systems just need a level surface, water is self-contained and the space below allows airflow to prevent surface damage.
- ③ **Safe** - all materials are chosen to be safe to grow your food. Our system increases this safety by not having saturated soil that causes leaching.
- ④ **Healthy** - organic soil that maintains a perfect hydration to develop a complete ecosystem to unlock full growing potential and help prevent diseases and reduce pests.
- ⑤ **Conserve Water** - use up to 30x less water than hand watering, 10x less than drip systems by nearly eliminating evaporation.
- ⑥ **Durable** - we want your garden to last, so we use long-lasting materials that provide up to 5 years with no maintenance. Your garden is warranted for 10 years and we built it for a 25 year lifetime.

Dimensions

Your Avalow is ergonomically-sized at just over 2 feet tall with an equivalent growing space of 3 square feet.

Outside dimensions are 27 inches across by 15 inches wide and 27 inches tall.

Warranty

Our Warranty offers the following:

Guaranteed 10 year structural warranty and 5 year reservoir performance warranty
Technical support via phone & email - grow@avalow.com
High quality components, designed to work individually and together to deliver the specified level of performance

Customers Responsibility:

Proper access to installation, soil maintenance and regular watering
Placement location levelling and access to adequate sun
Only claims by the purchaser for the products will be entertained by Avalow

The Warranty excludes the following:

Natural disasters or Acts of God where the manufacturer could not warranty the performance of the product.
Damage by improper installation or end-user due to negligence or willful damage.
Negligence to conduct regular maintenance
Avalow will replace defective product, however we will not be responsible for consequential damages that may be claimed as a result.
