

LAND ROVER

DEFENDER 90 V8

**EXHAUST PRODUCT
INFORMATION**

PERFORMANCE EXHAUSTS...
ZERO COMPROMISE

P525 SUPER CHARGED 5.0 V8

With 518BHP on-board, the Defender V8 is immensely powerful.

However the introduction of a GPF (Gasoline Particulate Filter) in the vehicle's standard exhaust system really limits the aural potential of the power plant.

AUDIBLE EMOTION

Developed in conjunction with Vertu Land Rover, Cobra Sport's Performance exhaust releases the V8's vocal chords creating a transformational drive every time you climb in the Defender.

By optimising exhaust gas flow and showcasing superior TIG welding the Cobra Sport system produces an aggressive growl that resonates more with Land Rover's loyal customers and reminisces on times when V8's roared from factory.

“

For those looking to awaken the sound and performance of their Defender, Cobra Sport's GPF-back system is the optimum upgrade adding style, performance and sound.

”

UNRIVALLED SOUND

Being one of the most iconic 4x4's on the road, the Land Rover Defender 90 (L663) has big boots to fill, and Land Rover have worked tirelessly to ensure the latest generation Defender is more capable than its predecessor - both on and off-road.

Rigorous testing and comparisons left the Cobra Sport development team settled on an increase of +7dB.

The exhaust creates a raucous V8 growl that completely transforms the drive of the Defender delivering amplified emotion from the moment the engine turns.

Significantly enhances the V8 tone and sound of the Land Rover power plant.

+7dB

Engine at idle: 66.5dB (+6.4 dB)
Static 4,000rpm test: 89.3dB (+7 dB)

**PERFORMANCE EXHAUSTS...
ZERO COMPROMISE**

Cobra Sport performance exhausts transform your drive, delivering an exhilarating experience every time you get behind the wheel. Pitch perfect exhaust tones combine with striking aesthetics and attention to detail, while the highest quality stainless steel is hand crafted to make Cobra Sport the pinnacle for tuners, racers and all true car enthusiasts.

Cobra Sport have improved the styling of the Land Rover Defender V8 90 creating a noticeably enhanced and balanced look to the rear of the Defender V8 90 with a choice of quad 4in/101.6mm tailpipes.

For those looking to take the style upgrade a stage further, upgraded carbon fibre tailpipes are available as an optional extra.

CARBON FIBRE

Aggressive looks to match the modern styling of the new Defender.

TAILPIPE CHOICES

Choice of quad 4in/101.6mm tailpipes including highly polished stainless-steel, black ceramic coated and carbon fibre.

Like all Cobra Sport exhausts, this system utilises precision TIG-welding techniques for exemplary fit and finish – a feature that gives Cobra Sport an advantage over other manufacturers.

With over 25 years in the performance exhaust industry, each Cobra Sport exhaust system is designed, manufactured and tested in Sheffield, the heart of the UK steel industry.
