

MURPHY DOOR

Cabinet Door Installation

Hinge Plate

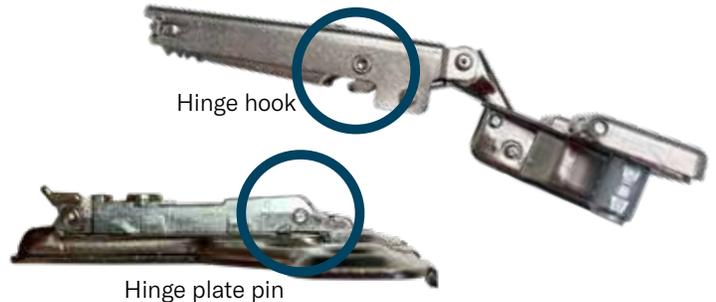

Standard Hinge

Soft Close Hinge

Mount hinge plates 2" from the upper and lower rail on both sides of the bookcase.

Lift plate on the hinge and insert into pre-drilled depressions on the cabinet door back - standard hinges at the top, soft close hinges at the bottom. Snap shut to lock into place.

Hinge hook

Hinge plate pin

Connect the hinges to the plates installed on the bookcase. Position the small hinge hook on the hinge plate pin then press down front to secure.

Use the screws in the hinge to adjust door placement. The front screw brings the door to and from the center when the cabinet door is closed.

The back screw brings the door to and from the frame.
