

Master Cattle Crush

Introducing the perfect solution for working with large animals! Our Master Cattle Crush is designed to make it easier to work with and handle large livestock, such as cows and bulls. Our Master Cattle Crush is constructed with high-quality steel and includes full height side gates along with our user-friendly automatic Ultimate Headbail to easily catch and securely maintain your animals in place. The split side gates with top inspection gates and the added option of a rear vet area provides great access to your animals, helping to keep them secure during treatments or vaccinations. It's the perfect choice for managing your livestock.

The Master Cattle Crush features our Ultimate Headbail. This headbail can operate in either automatic or manual modes. Use as a conventional manual headbail, or set to auto-catch to make bailing your animals faster and easier.

Features

The gates swing on 20mm greasable spherical rod end bearings giving a smooth gate action and the ability to adjust your gates if they ever sag.

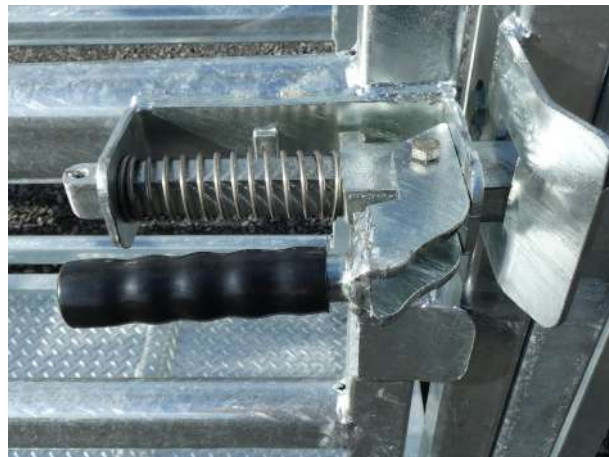

The Master Crush comes standard with a heavy duty rubber floor with large cleats to provide great grip for your animals.

Wide loadbar mounts designed to fit all types of load cells.

Anti backing ratchets help to move your animals forward and hold them securely.

Heavy duty slam latches on gates featuring stainless steel springs and moulded hand grips.

Options

- Steel, rubber or no floor options.
- Rear operation handle
- Offside drafting handle
- Rear vet area.
