GlobalSign is an identity services company providing cloud-based, highly scalable PKI solutions for enterprises needing to conduct safe commerce, communications, content delivery and community interactions. Our identity and security services are delivered via a WebTrust audited robust infrastructure with global data centers, redundancy, high availability, world-class instrumentation protecting the network, and massive scalability demanded by the emerging \$14.4 trillion IoE market. We deploy publicly trusted and private PKI hierarchies through our cloud services. We provide direct integration into local/cloud directories, extended customer/partner databases, and enterprise applications and networks. Whether a device, service or user, we can help you achieve your security requirements. As well as being a founding member of the CA/Browser Forum, we are enrolled on the following trust lists:

- WebTrust
- Adobe Approved Trust List (AATL)

Yours faithfully,

James Whitton  
Regional Partner Manager EMEA
