- Please use a registered electrician to install the ceiling canopy.
- Turn power off before installing the pendant.
- Choose appropriate hardware to attach ceiling canopy to ceiling substrate.
- Install as per AS/NZS 3000
- 230 V a.c. 50 Hz only.
- Supply earth must be connected to the ceiling canopy earth.
- 75 Watts MAX / E27 Bulb.
- For INDOOR USE only.
- Total hung weight must not exceed 5 kg.
- SDoC available on request.

Step 1.

Set the height of the pendant shade by adjusting the flex cable and suspension wire at the ceiling canopy.

Step 2.

Once the canopy is securely fixed to the ceiling substrate, thread the pendant balancer through the top of the pendant shade.

Step 3.

Level the pendant shade to sit horizontal on the pendant balancer.

Attaching ceiling canopy to ceiling substrate

Remove circular canopy plate (attached with magnets) to access screw mounts.

Care Instructions

Lineage pendants are intended for use in dry interior environments only. Prolonged exposure to direct sunlight can result in damage. Clean with a soft cloth slightly dampened in warm water when the light is switched off. Do not use solvents or detergents to clean.

Handmade

Because the Lineage pendant is handmade using natural materials, please expect small variations in weight, size, shape, colour and grain when compared to promoted products.

Warranty

The Lineage Dome is warranted for two years from date of purchase for failure of parts. Please note: Some pendant shades may exhibit minor cracks and fluctuations in form due to the expansion and contraction of materials reacting to changes in humidity and temperature. Small cracks and shape variations are not covered by this warranty. However, if you encounter a genuine issue, please let us know so that we can explore a resolution.
