RE: Acceptance Criteria for Cannabidiol (CBD) Products

Summary: In 2019, USPS acknowledged the legal status of hemp derived CBD and provided temporary "acceptance criteria" for demonstrating when a mailing is compliant with the Agricultural Act of 2018. The letter below has been provided to demonstrate compliance and includes a signed self-certification statement subject to the False Statements Act.

To whom it may concern,

Trim Ready Inc is a registered Industrial Hemp Handler based in Las Vegas, Nevada with valid Department of Agriculture Issued license # 202010 H. In addition, Trim Ready Inc has local authorization in Clark County (200197.042-101).

Enclosed you will find supporting documentation that Trim Ready Inc;

1. Possesses an Industrial Hemp Producer license issued by the Department of Agriculture, for the state where the Post Office/ acceptance unit is located.
2. All Industrial Hemp and CBD products are produced from Industrial Hemp only and contains a Total THC (THCA + Delta-9) concentration of not more than 0.3% on a dry weight basis, which can be validated by looking at the test results (COAs).

Furthermore, Trim Ready Inc has identified itself as the registered producer and has authorized _____ to market products manufactured by Trim Ready Inc d/ba CBD Hemp Direct.

In closing, pursuant to the False Statements Act, I certify that all information contained in this letter and supporting documents are accurate, truthful, and complete. I understand that anyone who furnishes false or misleading information or omits information relating to this certification may be subject to criminal and/or civil penalties, including fines and imprisonment.

President - Trim Ready Inc d/b/a CBD Hemp Direct
Notary Public – State of Nevada (16-2938-1)

WHAT TO KNOW ABOUT TOTAL THC TESTING

In late 2019, U.S. Department of Agriculture (“USDA”) released its interim final rule for the production of hemp under the 2018 Farm Bill. The USDA adopted a total THC testing requirement stating;

THC is the molar sum of delta-9 THC (“THC”) and delta-9 tetrahydrocannabinolic acid (“THCA”).

Below is an analysis and further breakdown of our test results so you verify our compliance with the current USDA rules:

Lic. #

Paradise OG
Plant, Flower - Cured
Harvest Process Lot: MFTRC-01000 - MFTRC Sample

Sample: 1909NVC1403-7041
Strain: Paradise OG

Sample Received: 09/09/2019; Report Created: 09/12/2019

Total THC is the molar sum of delta-9 THC (“THC”) and delta-9 tetrahydrocannabinolic acid (“THCA”)

<LOQ

<LOQ

21.814%

THCa

Total THC

Total CBD

LOQ = Limit of Quantitation = 0.116%
If a report shows <0.116%, it means the sample is below 0.116% in THCa, delta-9 THC & Total THC.

Cannabinoids

Analyte	Mass %	Mass mg/g
THCa	<LOQ	<LOQ
Δ9-THC	<LOQ	<LOQ
CBDa	18.760	187.60
CBD	5.361	53.61
CBC	0.389	3.89
CBG	0.227	2.27
CBN	<LOQ	<LOQ
THCV	0.129	1.29
Δ8-THC	<LOQ	<LOQ
CBGa	0.509	5.09
CBDv	<LOQ	<LOQ
Total	25.375	253.75

Calculation used to determine Total THC and Total CBD.

Total THC = THCa * 0.877 + Δ9-THC + Δ8-THC
 Total CBD = CBDa * 0.877 + CBD

LOQ = Limit of Quantitation; The reported result is based on a sample weight with the applicable moisture content for that sample; Unless otherwise stated all quality control samples performed within specifications established by the Laboratory; Cannabinoids analyzed by SOP-021.

What is CBG?

One of our most exciting and highly anticipated releases is CBG Flower! Cannabigerol aka CBG is known as the parent cannabinoid; cannabis plants produce cannabigerolic acid (CBG-A). Specific enzymes in the plant break down CBG-A, and direct it down one of three main cannabinoid lines - tetrahydrocannabinolic acid (THCA), cannabidiolic acid (CBDA), and cannabichromenic acid (CBCA). As with CBD, CBG is non-psychoactive, so you get the medical benefits without getting 'high'. In the right dose, CBG could act as an antibacterial, anti-convulsive, anti-inflammatory, antidepressant, and appetite stimulant. As with all cannabinoids, additional research is needed to better understand the full range of medical potential of this natural compound so please consider trying CBG flower to determine if it is right for you.

CBD (Cannabidiol) Patient Education Guide

- CBD (Cannabidiol) is one of a group of unique chemical compounds that are found only in the cannabis or hemp (cannabis sativa) plant. CBD does not get you high. In fact, when taken with THC, CBD can actually reduce how high you can get.
- When CBD is activated (smoked, vaped or ingested), it turns on specific receptors that influence body functions such as:
 - Appetite, pain sensation, mood, memory and anxiety.
- Some of the effects of CBD include:
 - Antiemetic (reduces nausea and vomiting)
 - Anticonvulsant (suppresses seizures)
 - Anti-inflammatory (mitigates inflammatory disorders)
 - Antitumoral (fights tumor and cancer cells)
 - Anxiolytic (Combats anxiety and depression)
 - Antioxidant (tempers neurodegenerative disorders)
 - Antipsychotic (mediates psychotic disorders)
- CBD currently has potential to fight diseases such as:
 - Schizophrenia, Psychosis, Epileptic disorders, Anxiety, Depression, Cancer, Osteoporosis, Loss of appetite, Nausea, Lupus, Obsessive-compulsive disorder (OCD), Parkinson's disease, Chronic and acute pain, Diabetes, Neurodegenerative disorders (e.g., Alzheimer's)
- Terpenes: Aroma and taste molecules that can have a big affect on your strain.
 - **Caryophyllene** – Pepper smell and cinnamon smell. Anti-inflammatory, anti-anxiety and anti-depressant.
 - **Humulene** – Basil and herbal smell. Suppresses hunger, anti-tumoric and anti-bacterial.
 - **Pinene** – Fresh, piney smell and flavor. Promotes alertness and energy.
 - **Myrcene** – Earthy, skunk smell and flavor. Known for sedative effects and shows promise as a sleep aid.
 - **Guaiol** – Potent, piney and therapeutic.
 - **Bisabolol** – Fragrant chamomile smell. Known for anti-oxidant, anti-microbial and analgesic effects.
