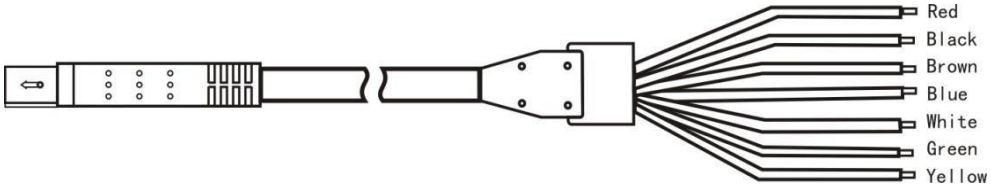
Power cable

Installation of U-support Bracket



AUTO BATTERY HARD WIRE CONNECTION SETUP

(most common but could vary based on preference)

Powering Monitor and Digital Camera's

- Only the black (ground) and red (power) is needed for system to work. The colored wires are used for a custom install with triggers.(colored wires are not typically used)
- Individually wrap wire tips with electrical tape on all other colored wires so that they do not touch metal and cause interference.
- Connect ground and positive wires to auto battery and connect other end to LCD monitor.
- Connect only the quick disconnect cable to a power source.
- Do not connect the quick connect cable from the camera until instructed below.
