THERMAL BLANKET

Experience the pinnacle of pool solar heating with our specialised expertise, exclusively employing the premium Sunbather 4mm Heat Guard thermal blanket material. Meticulously crafted with top and bottom welds on every seam, our solution guarantees unparalleled strength and durability. The final touch of sleek edge binding not only adds a touch of elegance but also ensures seamless water flow through the blanket, preventing any water from getting trapped. Elevate your pool heating experience with our commitment to quality and innovation.

THERMAL BLANKET | THE PROCESS

STEP 1: WE MEASURE YOUR POOL

One of our skilled cover specialists will visit your location to assess and measure your pool. They will take detailed photos to ensure that the cover is perfectly tailored to fit your pool.

STEP 2: YOU CHOOSE A COLOUR

When you decide to proceed, you have the flexibility to choose a color of your preference. Should you require assistance in making this choice, we are more than happy to provide guidance. Our available color options include black, silver, or blue.

STEP 3: CUSTOM MAKE & INSTALL

After obtaining the measurements, and colour specifications, our in-house seamstress will expertly craft a custom cover designed to fit your pool perfectly. Once ready, we'll return the cover to you and ensure it is installed seamlessly, aligning with the chosen Downunder or roller specifications.

*in some cases we will cut to shape

THE DOWNUNDER RANGE

Enhance your comfort by pairing your custom thermal blanket with one of our versatile roller options. Our in-ground and in-deck Downunder Rollers not only deliver a sophisticated, discreet look but also effortlessly tuck your blanket away when not in use and seamlessly retrieve it as needed. Additionally, we offer a diverse range of rollers to cater to your specific requirements, whether that entails wheels, wall mounts, bench integration, seating concealment, or even motorized functionality.
