

HORSE RUGS

SIZING AND CARE GUIDE

RUG SIZING

All Zilco rugs are based on tried and proven patterns, based on International sizing. When choosing a Zilco rug, you must consider the measurement of the horse in relation to the size of rug it needs. This is important to ensure an optimal fit, comfort, and for ease of movement.

Before choosing a rug from the Zilco range, we recommend that the horse be measured from (A) the centre of the horse's chest, over the high point of the shoulder and then to (B) the rear of the hind leg. For the best performance, ensure the rug is the right size for your horse. Rugs should be positioned well forward and fastened firmly in order to prevent the rug from slipping out of place.

HEIGHT OF HORSE	RUG SIZE (FEET/INCHES)	RUG SIZE
8 Hands & Under	3'9"	114 cm
8 - 9 Hands	4'0"	122 cm
9.2 - 10 Hands	4'3"	130 cm
10 - 11.2 Hands	4'6"	137 cm
11.2 - 12 Hands	4'9"	145 cm
12 - 13 Hands	5'0"	152 cm
13 - 14 Hands	5'3"	160 cm
14 - 14.2 Hands	5'6"	168 cm
14.2 - 15 Hands	5'9"	175 cm
15 - 15.2 Hands	6'0"	183 cm
15.2 - 16 Hands	6'3"	190 cm
16 - 16.2 Hands	6'6"	198 cm
16.2 - 17 Hands	6'9"	206 cm
17 Hands & Over	7'0"	213 cm

FITTING RUGS

We pride ourselves on the fact that our rug patterns produce a great fit on a huge variety of horse shapes and sizes, however even the best design available will not give the best results if it is fitted incorrectly.

- Place the rug forward and in front of the wither. The chest buckle should be fastened to the 1st or 2nd hole. Any further back than this, and the horse may need a larger size.
- Make sure the rug fits firmly around the neck and chest. This prevents the rug from “rolling” and slipping out of place
- Leg straps should be looped around each other, and loose enough to prevent chafing - but not so loose that they hang down anywhere near the horse’s hock
- To prevent mane rub, clean the satin lining on the neck rug (where applicable) once a week, and spray the mane with a conditioner or detangler
- Leg strap clips should face inwards (towards the horse) to reduce the chance of catching on fences or other hazards

CARE OF ZILCO WATERPROOF RUGS

Zilco’s range of synthetic rugs are made from technologically advanced synthetic materials. To ensure the waterproof properties are retained, we recommend the following:

- If the rug is removed whilst damp or wet, it should be hung up in a dry, well ventilated area.
- Zilco rugs may be washed in cold water on a gentle cycle, or by hanging over a clothes line and hosed. Do NOT scrub or wash with detergents as this can damage the waterproofing.
- Always follow the directions as they appear on the package or labelling
- When not in use, rugs should be stored in a dry place with good ventilation.
- Occasionally in heavy rain, some moisture penetration may occur in the sewn areas of the rug. This is not significant and due to the positioning of the stitching, it will not affect the performance of the rug. Moisture penetration can also happen as a result of the horse standing tail-in or head-in to the weather, particularly when windy. This is normal, and no rug can completely protect from this.

Zilco canvas rugs are sewn using a specially developed cotton covered nylon thread. This is designed to swell when wet, to completely fill the stitch holes. It is recommended that before using a Zilco canvas rug, to completely wet the rug first and allow to dry.

RUG WARRANTIES

Zilco rug users have always trusted the design and quality of our rugs. Customers can now shop with even greater confidence as a large selection of our range are now backed with a formal warranty that guarantees the waterproof qualities of the material, and the durability of the hardware fittings to the original purchaser. Full warranty details are included with each rug purchased. Look for the 1 and 2 year warranty symbols noted in the product details.
