

THE **B** **E** **S** **T** TRADING METHOD

DISCLAIMER

Please notice we do not provide financial advice - our website, indicators, strategies are intended to provide only source code for anyone interested in improving their trading.

The Company publishes products and services for developing trading indicators and strategies on demand, renting and selling proprietary indicators and strategies, training, coaching, financial transactions, exclusively intended for consumers, marketed through its website (<https://www.best-trading-indicator.com>).

The list and description of the goods and services offered by the Company may be consulted on the aforementioned sites

1. INTELLECTUAL PROPERTY

The **proprietary** indicators and strategies developed by Company (The Algorithm Builders, Backtest suites, and other utility scripts), the object of intellectual property rights are and remain the exclusive property of the Company (Best Trading Indicator), at the exclusion of images and videos and texts free of rights or provided by Company or external legal or physical person.

No assignment of intellectual property rights is carried out through these Terms and Conditions.

Any total or partial reproduction, modification or use of these properties for any reason whatsoever is strictly prohibited without the express written authorization of the Company.

The titles, descriptions, essential characteristics and respective prices of the Company's products and services are available on its websites.

2. RESPONSIBILITIES

You declare to know the principles and risks of the financial markets. Therefore, you declare that you are aware of the financial risks involved in trading.

In this sense, the directors, employees, stakeholders and partners of the Company can not be held responsible for errors, omissions, inappropriate investment, technical problems, events beyond his control, and, more generally, financial losses that you may realize, or results obtained in the practice of trading resulting from the services or products it markets.

The Company guarantees that the contents of our products and services are complete, but does not guarantee your success in the markets.

The information and analysis produced by the Company is only a decision aid for investors. The responsibility of the Company can not be held directly or indirectly following the use of information and analysis by readers. The Company is an independent research office. The reader is informed that the Company has no conflict of interest that could affect the objectivity of its analysis.

The Company can not be held liable for the financial or other consequences of the result of the acquisition or sale of the cited indicator. This information is in no way a solicitation to buy or sell the product or underlying product to which it relates. Investors will be required to make their own risk analysis and, if necessary, consult their legal, financial, tax, accounting or other professional advisors beforehand.

3. RISK WARNING

Trading involves a high level of financial risk, and may not be appropriate because you may experience losses greater than your deposit. Leverage can be against you.

Do not trade with capital that you can not afford to lose. You must be aware and have a complete understanding of all the risks associated with the market and trading. We can not be held responsible for any loss you incur. Trading also involves risks of gambling addiction.

3.1 CFD RISK WARNING

CFDs are complex instruments and present a high risk of rapid capital loss due to leverage. 69.66% of retail investor accounts lose money when trading CFDs with this provider. You need to make sure that you understand how CFDs work and that you can afford to take the likely risk of losing your money.

3.2 RISK may exceed deposit

Trading involves a high level of financial risk and losses can exceed deposits.

4. HYPOTHETICAL PERFORMANCE RESULTS

Hypothetical performance results have many inherent limitations, some of which are mentioned below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example the ability to withstand losses or to adhere to a particular trading program in spite of the trading losses are material points, which can also adversely affect trading results. There are numerous other factors related to the market in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

SUMMARY

❖ PART I - **Our Story**

❖ PART III – **Subscription Packages and Pricing**

❖ PART III – **Highlights of our Trading Method**

❖ PART IV – **Supports and Resistances**

❖ PART V – **The Built-in Trade-Manager**

❖ PART V - **Setting-up your TradingView**

OUR STORY (1/3)

💎 Best Trading Indicator™ is a French company made by **two French traders - a father and his son**

💎 Teaching with **our guided course** our proven trading method for **all asset classes, all trader types (intraday, swing, scalpers) and compatible with many brokers.**

💎 We're trading together with our subscribers, **the same BEST entries/exits available on everyone's TradingView charts**

OUR STORY (2/3) - DAVE

- 💎 The son is me [Dave](#) (or Daveatt from TradingView) CEO and co-founder of Best Trading Indicator™
- 💎 I'm a quant trader with a Master in **Computer-Science Engineering and Project Management**
I'm now working for myself with **8+ years** of quantitative and trading experience.
- 💎 My **father** and **business partner** **taught me** at a very young age **everything he knows about trading**
- 💎 **My coding background** was very useful when professional/retail traders hired me to **design, code and implement** their indicators/semi-automated/fully-automated strategies across many brokers.
- 💎 I've been doing those freelance missions mainly from New York City/USA and then from other countries (Spain, Indonesia, Japan, London, Costa Rica, France, ...)

OUR STORY (3/3) – MY FATHER

- 💎 My father has been trading for **20+ years now** and has a very advanced **Trading Quant + Trading experience**
- 💎 We started with **INDICES trading** and **we're still trading** them actively
- 💎 Our trading is diversified with **a unique** TradingView BEST Framework for **each asset class and timeframe**
- 💎 We collaborated to mix his remarkable **experience of the financial markets + my coding skills + our respective trading experience**
- 💎 Then we created Best Trading Indicator™ as we are convinced that **even inexperienced traders could benefit greatly from our systems**
- 💎 We're often trading together in our home-made trading-room and **constantly looking to optimize our systems for our subscribers**
- 💎 He's assisting me behind-the-scene for teaching our customers our Trading Method course and accelerating their ramp-up

PART II – Our Subscriptions Packages and Pricing (1/3)

PREMIUM 3 MONTHS	PREMIUM 6 MONTHS	PREMIUM 12 MONTHS RECOMMENDED
118€ Monthly	105€ Monthly	83€ Monthly

PART II – Our Subscriptions Packages and Pricing (2/3)

💎 Our goal is to teach you what we learned over **20+ years in a few days/weeks only** during your TRIAL period

💎 **3 PREMIUM packages** are available for recurring subscription with a **1 WEEK FREE TRIAL** period

💎 In term of benefits/features/scripts

- The **PREMIUM 6-months** contains more advantages at a lower monthly price than the **PREMIUM 3-months**
- The **PREMIUM 12-months** contains more advantages at a lower monthly price than the **PREMIUM 3-months** and **PREMIUM 6-months**

💎 The **PREMIUM 12-months** gives access to a **FREE 1-to-1 Coaching/Mentoring call** that can be requested during the TRIAL period also

💎 Our [Pricing & Plans](#) page is available from the **header menu of our website**

PART II - Our Subscriptions Packages and Pricing (3/3)

💎 Upon subscription you'll receive by **email** your **access key within 1 business day**

💎 Your access key **is valid for all your Best Trading Indicator scripts**

💎 It expires **at the end of your FREE TRIAL** and automatically renew after each payment

💎 For each script, insert your access key, **double left-click** on the **GEAR icon located at the right of the indicator name** OR **on the indicator name directly**

💎 If **inserted correctly**, your chart will **automatically** refresh **with the signals after a few seconds**

- make sure to **NOT** insert additional **character/blank space** at the beginning or at the end of your access key

💎 **If your key isn't working**

Please send us an email to **dave@best-trading-indicator.com**

PART II - Download your indicators

📌 Click on the **Indicators** icon at the **TOP** of your **TradingView**

📌 Your indicators are available in your **Invite-only list**.

The author (as per the image) is me **Daveatt**

The screenshot shows the TradingView interface with the 'Indicators' menu open. The top bar includes 'BANKNIFTY', '30m', and various chart tools. The main chart area displays 'NIFTY BANK · 30 · NSE' with price data: 'O20274.55 H20317.60 L20263.10 C20317.60 +44.70 (+0.22%)'. The 'Indicators & Strategies' panel is open, showing a search bar and a list of scripts. A green arrow points to the 'Indicators' icon in the top bar, and another green arrow points to the 'Invite-Only Scripts' category in the panel. The 'Invite-Only Scripts' list includes several 'Algorithm Builder' scripts, all attributed to 'Daveatt'.

Script Name	Author
Algorithm Builder (Signal version)	Daveatt
Algorithm Builder - INDICES	Daveatt
Algorithm Builder - Multiple Trends	Daveatt
Algorithm Builder - Multiple Trends+ (+ Trade Manag...	Daveatt
Algorithm Builder - Multiple Trends+ (Plug & Play)	Daveatt
Algorithm Builder - Single Trend	Daveatt
Algorithm Builder - Single Trend+	Daveatt

TRADING METHOD – GENERAL (1/4)

❖ **BAD** traders only care about **PROFIT** and **GREAT** traders are obsessed with **RISK** management

❖ **BAD** traders are on their way to become **GREAT** traders once they understand that **RISK MANAGEMENT** has more weight in the profitability equation than **PROFIT**

❖ We are annoyed with all the **FAKE** trading education out there from people that never traded. What they teach only focus on the **PROFIT** dimension **without a proper risk and money management.**

❖ Our systems for **all asset classes** (Stocks/Forex/Indices/Cryptocurrencies/Commodities), **all traders type** (Intraday/Scalp/Swing) and **all traders profile** (beginners/experimented) are designed to make hundreds of points/pips/EUR/USD/... every day with an **extremely lowered RISK**

TRADING METHOD – GENERAL (2/4)

- ❖ We made our systems **simple and abstract enough for any trader profile**
- ❖ With our Method, **no other indicator, analysis, social media** is needed in parallel
- ❖ Our Trading Method **is an assisted step-by-step guide** available from our Community Forum to the Premium subscribers
- ❖ Upon subscription, we send **a summarized PDF version** with a great coverage of most of the entry and exit setups
- ❖ **1** TradingView chart and **2** of our indicators set on that chart is all we and our subscribers

TRADING METHOD – GENERAL (3/4)

💎 After **15-30 minutes of left-scrolling** on your TradingView charts, you'll realize that:

- The entry and exit signals make sense
- Making more than [200-500] pips/points a day

💎 **Our goal is to re-wire your brains about what trading really is**

- It's not a get-rich-quick scheme
- It's a get-richer process requiring you to trade in a more **algorithmic way**

💎 **Trading with low timeframes is our BEST answer** to be more accurate and reducing your potential losses

💎 **Facts**

- You'll have some losing trades.
- Not all trades are winners
- Our frameworks give more winners than losers
- Winners are much bigger than the losers

TRADING METHOD – GENERAL (4/4)

- ◆ Our systems detect automatically **strong convergences** based on custom indicators we developed for ourselves over **8 years of trading**
- ◆ We are trading with the **same TradingView scripts and the same Trading Method** we're teaching to our students
- ◆ Our **entries and re-entries** are designed **to be as early as possible** while keeping the **RISK minimum**
- ◆ We provide also a complete EXIT system **for Stop-Loss and Taking Profit**

TRADING METHOD – THE BEST WAY OF TRADING

- ❖ You **don't need to stay in front of your charts all day**
- ❖ You'll get alerted with your/our TradingView server-side alerts by (**Email and SMS and from your TradingView chart**)
- ❖ Evaluating an **entry/exit** signal will take you **no more than 15 seconds**
- ❖ Waiting in front of your charts when there is no signal **increases your Fatigue and decrease your profits**
- ❖ **It's much smarter** to set the alerts on the assets/timeframes you want to trade and **do something else** for the time being

Trading Method - The Algorithm Builders Frameworks and timeframe (1/2)

SCRIPT NAME	SCRIPT TIMEFRAME(S)	TRADING STYLE	ASSET CLASS
BEST Algorithm Builder INDICES	1-minute or 2-minutes (several trades a day per asset) 5-minutes (1-2 trade(s) a day per asset)	Intraday	Indices/Indexes
BEST Algorithm Builder INDICES	5-minutes (a few trades a day per asset)	Intraday	Indices - Stocks Options - Forex
BEST Algorithm Builder UNIVERSAL	15-minutes	Swing	Cryptocurrencies Forex Commodities Indices Stocks
BEST Algorithm Builder CRYPTO	2-minutes (several trades a day per asset) 5-minutes(1-3 trade(s) a day per asset)	Intraday	Cryptocurrencies
BEST Algorithm Builder CRYPTO	5-minutes (1-3 trade(s) a day per asset)	Intraday	Forex - Stocks - Commodities
BEST Algorithm Builder STOCKS	30-minutes	Swing	Stocks Commodities

Trading Method - The Algorithm Builders Frameworks and timeframes (2/2)

💎 **We tested all timeframes and a huge amount of algorithm combinations.**

The current algorithms and timeframes below are our best suggestions so far and we don't recommend trading with another timeframes without asking for our opinions first.

💎 **Commodities look great with both the 15 and 30 minutes**

We let the traders selecting what he/she prefers

💎 **Stocks can be traded using either the 15-minutes Algo Universal or the 30-minutes Algo Stocks**

💎 **The BEST Algorithm Builder Crypto** applied on a 5-minutes chart seems to work wonderfully also on FOREX and Stocks Options assets

💎 **Whenever multiple timeframe versions are available for an asset class, it's up to the PREMIUM subscriber to chose the model he/she feels more comfortable with.**

The Built-In Trade Manager : Features

- ◆ Included in **ALL** of our Algorithm Builder Frameworks
- ◆ **Compatible** with **Spot/CFDs/Futures/ETFs/Options/...** trading products
- ◆ **Display** the **user-defined Take-Profit and Stop-Loss Levels** and **Enable** TradingView server-side alerts
- ◆ **Define** Take-Profit and Stop-Loss custom levels based on **either price value/percentage/pips distance**
- ◆ **Display** the **Risk-To-Reward ratios** when the user-defined Stop and Take Profits are defined in the indicator settings
- ◆ **Display** the **BEST PnL Panel** colored in green for a LONG and in red for a SHORT
(The default colors may be changed from the **Style tab** of your Algo Framework – more info on the slides below)

The Built-In Trade Manager : The Profit and Loss Panel

💎 Display **real-time actionable data for the current trade**

- **Profit and Loss** in pips/points and in percentage value
- **Maximum Drawdown** in percentage and pips/points – **measure the maximum loss for the current trade**
 - For a **LONG**, the distance between the entry price and the LOWEST reached price level
 - For a **SHORT**, the distance between the entry price and the HIGHEST reached price level
- **Maximum Opportunity** in percentage and pips/points – **measure the maximum opportunity/win for the current trade**
 - For a **LONG**, the distance between the entry price and the HIGHEST reached price level
 - For a **SHORT**, the distance between the entry price and the LOWEST reached price level
- **Distance in pips/points** until the next Take Profit 1-2-3 price level if not reached yet
- Flag if **any of the user-defined Take Profits and Stop-Loss levels have been reached**
- Flag a warning if a **hard-exit** is detected

Trading Method - The Built-In Trade Manager (Long example)

Daveatt published on TradingView.com, May 27, 2020 20:35:00 EET
FX:SPX500, 2 3013.8 ▲ +14.9 (+0.5%) O:3013.9 H:3014.8 L:3013.5 C:3013.8

Trading Method - The Built-In Trade Manager (Short example)

- Entry Risk/Reward TP3 : 3.44
- HARD EXIT DETECTED

TRADING METHOD – Candles Coloring (1/2)

💎 Activated by default but optional feature

Each color translates a different trades state

💎 For a Long/Buy Trade:

- **dark green** when the candle close is below the entry price (in a loss)
- **light green** when the candle close is above the entry price (in a win position)

💎 For a Short/Sell Trade:

- **dark red** when the candle close is above the entry price (in a loss)
- **light red** when the candle close is below the entry price (in a win position)

💎 **gray** when not in a trade

TRADING METHOD – Candles Coloring (2/2)

Daveatt published on TradingView.com, May 27, 2020 10:54:22 EET
FX:SPX500, 5 3027.1 ▲ +28.2 (+0.94%) O:3027.5 H:3027.8 L:3026.0 C:3027.1

TRADING METHOD – THE LEADING TREND (1/2)

💎 The Leading Trend is a **built-in but different system**

💎 Displays the Trend direction from a much bigger timeframe on your TradingView charts

💎 Activated by default

Each color translates a different bigger trend direction

💎 **By default**, the colors are as follow :

- **Green** if bullish
- **Red** if bearish

TRADING METHOD – THE LEADING TREND (2/2)

Daveatt published on TradingView.com, May 27, 2020 11:11:23 CEST
BYBIT:BTCUSD, 15 8932.5 ▲ +1.09% | O:8928.0 H:8993.0 L:8918.5 C:8932.5

TRADING METHOD – THE CLOUD (1/2)

💎 The Cloud is our **Custom Trend identifier**

💎 We made it such as to identify **strong trends and “risk” zones**

💎 In other words, identify if a trend is likely to **continue further or reverse**

TRADING METHOD – THE CLOUD (2/2)

Daveatt published on TradingView.com, May 27, 2020 11:03:34 CEST

BYBIT:BTCUSD, 15 8921.5 ▲ +85.5 (+0.97%) O:8928.0 H:8938.0 L:8921.5 C:8921.5

BTCUSD Perpetual Futures Contract, 15, BYBIT
BEST Algorithm Builder UNIVERSAL 4.0

TRADING METHOD – The EXIT process – Hard Exit (1/2)

- ❖ We **ditched** the Stop-Loss based on price or percentage level because it's not working
 - We needed a way to get stopped-out because the trade is wrong (and not getting stopped-out because of slippage or bad analysis).
 - We selected an algorithmic method as it's a **much smarter and efficient way to exit a trade** when invalidated
- ❖ Instead, we use our custom Stop-Loss called **“Hard-Exit”** and is a KEY component of our Trading Method
- ❖ This is our algorithmic way of warning our subscribers that they **MUST** exit the trade no matter what they think-feel-want
- ❖ We made **a unique Hard-Exit per Framework** ensuring our subscribers the losses being **minimal the vast majority of the times**
- ❖ Symbolized by a **brown vertical line**, the “Hard-Exit” is **an important signal** warning the trader to **exit as a reverse may likely happen**

TRADING METHOD – The EXIT process – Hard Exit (2/2)

Daveatt published on TradingView.com, May 27, 2020 09:28:13 EET
FX:US30, 5 25180 ▲ +118 (+0.47%) O: 25171 H: 25184 L: 25165 C: 25180

TRADING METHOD – The EXIT process – Take Profit Levels (1/2)

- ❖ The Take-Profit levels are based on **Algorithmic Multi-timeframes Supports and Resistances**
- ❖ You won't have to draw **any trendline or pattern or add any other indicator**
- ❖ Our Method is **complete and cover all scenarios to either exit with a small loss or taking-profit**
- ❖ Over the years, **we found for each asset class and timeframe**, the most relevant supports and resistances to be used as take-profit levels
- ❖ Because the candles often bounce on them, **we selected specific Moving Averages and Pivots for our Take Profit strategy**

TRADING METHOD – The EXIT process – Take Profit Levels (2/2)

Daveatt published on TradingView.com, May 27, 2020 10:31:10 EET
FX:SPX500, 5 3021.8 ▲ +22.9 (+0.76%) O:3019.7 H:3022.0 L:3019.7 C:3021.8

PART II - General Guidelines (Supports/Resistances)

💎 Script included for **FREE for all our PREMIUM subscribers**

💎 Please Have in mind how to use the SMAs/EMAs and Traditional Pivots from our *Algorithmic Supports and Resistances* [TradingView script](#)

💎 A simple moving average (SMA) is an arithmetic moving average calculated by adding recent closing prices and then dividing that by the number of time periods in the calculation average.

💎 A pivot point is a technical analysis indicator, or calculations, used to determine the overall trend of the market over different time frame.

Part III - To change the signals and the background colors (1/2)

💎 Keep in mind we'll always refer to Green/Red signals and Green/Red leading trend

💎 Though, you can change those colors if you fancy more colorful ones

💎 For doing so, **Double Left-Click on the Indicator name** then go to the **Style Tab**.

Part III - To change the signals and background colors (2/2)

◆ To change our BEST indicator colors

The screenshot shows the 'BEST Algorithm Builder INDICES 4.6' window with the 'Style' tab selected. The interface is annotated with red brackets and blue text instructions:

- Change the Leading Trend colors:** Points to the 'Leading Trend Background Colors' section, specifically 'Color 0' and 'Color 1'.
- Change the Hard Exit and Entry Price colors:** Points to the 'EntryPrice' and 'Hard Exit' sections, specifically 'Color 0'.
- Change the candles colors for the candles states (neutral, losing on a LONG, winning on a LONG, losing on a SHORT, losing on a SHORT):** Points to the 'Trade State Bar Colouring' section, specifically 'Color 0' through 'Color 4'.
- Change the Triangles/Diamonds colors:** Points to the 'Shapes' section, specifically the first four items.
- Change the Cloud bands color:** Points to the 'Cloud MA1' and 'Cloud MA2' sections.

◆ To change your TradingView chart Background color

The screenshot shows the 'Chart settings' dialog box in TradingView. The 'Appearance' tab is selected, and the 'Background' section is highlighted in yellow. A color palette is open, showing various color options. A green arrow points to the gear icon in the top right corner of the dialog box, with the text 'Click here' written in green.

Part III - Setting-up your TradingView server-side alerts (1/3)

💎 How many alerts per asset class?

We recommend **3 alerts per asset/instrument per timeframe per Algorithm builder**

More info available from our [Forum](#)

💎 How many server-side alerts per TradingView account?

Below are the number of **simultaneous activated** server-side alerts available **per TradingView account**

TradingView **Free**: 1

TradingView **Pro**: 10

TradingView **Pro+**: 30

TradingView **Premium**: 400

1 BUY alert and 1 SELL alert = 2 alerts

+ 1 Hard Exit alert

= 3 alerts

💎 BUY and SELL alerts

Use case: Detect the entry signals using the option **Once Per Bar Close**

Conditions name

🔔 **Buy Alert** 🔔 triggers for the **LONG/BUY** Triangle and Diamond signals

🔔 **Sell Alert** 🔔 triggers for the **SHORT/SELL** Triangle and Diamond signals

💎 HARD-EXIT alert

Use case: Detect our custom stop-loss using the option **Once Per Bar Close**

Condition name:

✖ **Hard Exit** ✖

Part I - Setting-up your TradingView server-side alerts (2/3)

If your chart displays a repainting warning when you're creating alerts (next slide)

It's coming from our multi timeframe scripts triggering this **warning** popup

Please ignore it - we guarantee our and alert don't and will never repaint

Warning

This alert may trigger differently than expected, since it's based on an indicator that can get repainted. Please read more in our [Help Center](#).

Cancel

Continue anyway

Part III - Setting-up your TradingView server-side alerts (3/3)

Repeat the process below for each **instrument and timeframe and framework**

1) Example with a **Buy Alert** for the Framework with the option **Once Per Bar Close**

2) After creating the BUY alert Subscribers have to create the **Sell Alert** with the option **Once Per Bar Close**

3) After creating both the BUY and SELL alerts Create the third one **Hard Exit**

The screenshot shows the 'Create Alert on US30' interface with the following settings and annotations:

- Condition:** Algorithm Buil... (Annotated with '3 - Select your Algorithm Builder')
- Buy Alert Trend:** Buy Alert Trend (Annotated with '2 - Click here to add alerts')
- Options:** Once Per Bar Close (Annotated with '5 - Make sure to select "Once per Bar Close"')
- Expiration time:** 2019-10-22 17:44
- Alert Actions:** Open-ended, Notify on App, Show Popup, Send Email, Webhook URL, Less Actions, Play Sound, Send Email-to-SMS (Annotated with '4 - We created 2 events. One for Buy and One for Sell')
- Message:** BTC Buy Alert Trend (Annotated with '6 - Personalize your alert text message')
- Buttons:** Cancel, Create (Annotated with '7 - Click on "Create"')
- Alerts Panel:** Shown on the right side (Annotated with '1 - Click here to show the alerts panel')

Dude - seriously - you are very good to us with your scripts. Thankful - it doesn't go unnoticed.

Vvp57 PREMIUM Aug 30
Thousands of thumb up Daveatt.. and thanks for share!

Runner_Santosh PRO Aug 20
Hey Dave,
CTD is another master piece mate. I wanted to let you know that your unique writing style is equally good as your scripts. Always fun to read.. Plotchar was real fun!

syrinxflunki PRO Aug 31
Gift that keeps on giving, max respect sir.

Runner_Santosh PRO Aug 11
Hey Dave,
Brilliant work with Preset script and also Trade Manager. I have been a big fan of Chris Moody's work and you have taken it to next levels.

Awes1989 Aug 29
Thank you so much, u are inspiration, u truly helping us be safe in trading world when all u see is confusing patterns and market behavior. I appreciate you and your work sir.

Ace567890 PREMIUM Aug 30
Thank you for the awesome content!

idrisbengali PRO Sep 10
Very few scripters explain usage... Commendable.
