Smart Watch User Manual

Thank you for choosing the smart quartz watch, launched by FOXWEAR and DayDay Band together. You can get better help and enjoyment for your exercises and health, with this watch. This manual briefly introduces the main functions and features of this watch. Besides, the new functions for the software are being updated continually. So when u get this smart bracelet and use it for the first time, if u find that some new functions or updated ones has not been included in this manual timely, pls understand about that. Thanks. At the same time, u are always welcomed to contact with our colleague of after-sale service on the official FOXWEAR website, to solve any of your problem during your usage.

Pls read the user manual firstly:

1. Before using the watch, pls read this user manual carefully. Pls use the watch rightly accordingly to the manual, so as to avoid the unnecessary trouble.
2. The manuals as per the defaulted settings of the watch.
3. The instance photo on the manual maybe different from the actual external design of the watch, pls understand about that.
4. Pls keep the manual properly, in case for the future repairing usage.

The System Requirements for the Cellphone Bluetooth:

Android4.3, IOS 7.0 or above. Support Bluetooth 4.0 mobile phone

Main Functions:

1. Time display, Intelligent clock.
2. Movement Records (pedometer, calories consumption, sleep monitoring).
3. The reminder of the incoming call, SMS and messages, like from WeiXin, QQ etc.
4. Intelligent Anti-Lost; Remote Photographing by Shake it off.
5. Record the Sport Track on the APP map.
6. Sport and health data sharing on the micro-blog, Twitter, Facebook.
1. OTA firmware upgrade online.

Function Operation:

1. Download and Install Watch APP/APK Client Software

As for the Apple mobile phones, pls search "DayDay Band" in the Apple store, download and install the watch APP ; As for the Android mobile phones, pls search "DayDay Band" in the google play store, 360 phone assistant, or the baidu phone assistant etc.in China. Also u can scan the QR code as follows , then download and install client APP/APK software for watch .

Android APP

IOS APP

2. Connect the Watch with the Mobile Phone.

Remark: The watch has the function of powering on/off. Before using the watch, pls press the "turn on/off" button to power on. When powering on, all the LED light will be on and it will chime for long; while it is powered off, it will only chime for long, no LED light will be on.

Please firstly read the user guide and help information before you use "DayDay Band " APP/APK for the first time, and then click the Settings icon on the top left corner of the home page. Select to search the equipment, the program will automatically search bluetooth devices nearby. And u can also gently slide the reflashing interface down, It will automatically search the bluetooth devices. Pls click it to connect the bluetooth of the watch when the " smart watch " appears on the APP. After the bluetooth is connected successfully, the LED indicator light of the watch dial will blink, and the APP/APK will automatically switch to the main interface.

Note: you can modify the name of the bluetooth devices on the APP.

3. Start to Use the Smart Watch

After the bluetooth of the watch is connected to the mobile phone successfully, it will begin to record your exercise and sleep status.

Note: The watch will start automatically to detect the sleep data after 6 pm, no sleep data during the day. When firstly using it, the watch needs to be connected with the APP, to calibrate the the watch data and it will sync the time automatically. Or the data of step calculation and sleep will be inaccurate.

4. synchronization data

Pls enter the menu interface of the pedometer and sleep, slide down menu, the watch data of step calculation and sleep will be synced in the APP/APK of mobile phone. Aslo watch will automatically synchronize step and sleep data regularly when watch is connected with Bluetooth(The APP/APK will show the sleep data information after u have slept for 3 hours).

5.Change the battery.

When the LED light on the watch keeps flickering or it indicates the low battery alarm on the APP/APK, it means the power of the bluetooth motherboard does not supply enough electricity (this battery usually needs to be changed every 3-6 months.). Or if u find the hands of clock stops walking, it means that the battery of the quartz watch has been depleted (this battery needed to be replaced usually around every 2 years). Please timely replace the battery for the watch. When changing the battery, please use the same type of battery and try your best to ask the professional or the repair man of the watch repair shop to replace it for your watch. When disassembling, pls use the specialized tools to open the rear cover of the watch. The button battery, SR621SW and CR2032 are respectively used as the one of the quartz movement and bluetooth motherboard of this watch.

Note: After replacing the battery and reassembling case, please pay attention to the spring on the motherboard contacting with the yellow buzzer, which is embedded within the bottom cover. If it has not been assembled properly, it will make the watch lose the sound.

6. Remarks:

1. The product uses 3ATM waterproof rubber ring, It can be used under the situation of normal water temperature, such as hand washing or swimming etc. But pls do not either immerse it in the water or wear it in the warm-water environment for a long time.
2. If found that there is no change for the data, please wait patiently for the data synchronization. It will takes some time for the synchronous data being uploaded.
3. In view of the limited memory of the watch, the watch usually can only save 7-day exercise data. Please regularly connect the bluetooth to the mobile phone, so you can upload and sync the data to your mobile phone with bluetooth.

Please leave a product review or seller feedback and share your experience with us and other customers!
