The end provides easy connection to any oxygen source. Use with standard oxygen supplies such as tanks, concentrators, or bulk systems.

A swivel connector is included to attach to any nasal cannula of your choice.

The Moisture Exchange Tubing resists the growth of bacteria and lasts for up to 6 months.

ABOUT AIRS

Advanced Interactive Response Systems (AIRS) was founded in Newaygo, Michigan by a registered respiratory therapist to bring needed oxygen solutions to the market. AIRS produces high-quality safety and monitoring products that improve patient health and care-giver performance.

Oxygen system irregularities can lead to patient respiratory distress, hypoxia and damage to vital organs. AIRS is focused on respiratory innovations that bring peace of mind and solve the current oxygen issues.
