

SPECIALIST FABRIC PROTECTION

Wortley offers two levels of fabric protection depending on the furniture application and performance requirements of the user.

Stain Protector is a simple, safe and effective way to enhance the liquid repellence of the fabric, whilst **Barrier Plus** takes protection to another level with a full liquid barrier applied.

Both are processed in Melbourne, and can be applied on fabric orders over 10mt.*

WORTLEY STAIN PROTECTOR

Wortley Stain Protector offers enhanced protection and soil resistance. It is treated through an advanced "emersion" finishing process prior to the fabric being upholstered.

Formulated and applied in Australia, it's repellency properties fully encase each fibre of the fabric extending protection against liquid based stains.

Any unfortunate accidents will remain on the fabric's surface longer so they can be easily wiped or blotted away.

As a water based product, Stain Protector is completely safe for humans and pets alike.

It is a simple and cost effective way to enhance the usability and life of your upholstery fabric.

WORTLEY BARRIER PLUS

Barrier Plus is a total treatment encasing the face and the back of the fabric.

By applying Barrier Plus, it ensures liquid stains and moisture cannot penetrate through to the cushion underneath.

For additional protection, a stain resistant formulation is included to make spills easier to remove from the surface of the fabric.

Barrier Plus has fire retardant and antimicrobial properties, ensuring suitability for a diverse range of applications where liquid protection and easy clean characteristics are important.

- Enhances fabric performance
- Heavy Commercial applications
- Applied in Australia, ensuring fast and flexible service
- Safe for humans and pets
- Environmentally Friendly
- Complete Moisture Barrier
- Odour Free
- Anti Bacterial, Anti Microbial & Anti Fungal
- Fire Retardant additives included
- Cost Effective
