

Crypton Fabric Cleaning Instructions

While the performance features of Crypton Fabric make it easy to clean, it is not self-cleaning. Use the simple instructions below to clean.

Spot cleaning

1. Blot any excess liquid; wipe away excess mess with a dry, clean towel.
2. Mix together a simple soap and water solution. We recommend mixing 1/4 teaspoon enzyme laundry or dish detergent, like Tide[®], Cheer[®] or Dawn[®], with 1 cup warm water.
3. Apply the solution and agitate with a soft bristle brush. Make sure to brush lightly and work from the outside of the stain inward so as not to spread the stain. Rinse your sponge or brush frequently.
4. Blot with a clean towel and rinse. Repeat if necessary.
5. And remember, soap attracts dirt so make sure to rinse thoroughly.
6. Allow fabric to air dry.

Bleach Cleaning Crypton Fabrics

1. Before bleach-cleaning, make sure fabric is dry and has been vacuumed, and that the space is ventilated.
2. Prepare a 10% bleach solution in water. NOTE: Chlorine bleach concentration can vary from manufacturer-to-manufacturer. Please read your bleach product label to determine the correct solution to prepare.
3. Test the solution in an inconspicuous location first before applying over the rest of the fabric.
4. Apply the cleaning solution using a misting spray bottle. Do NOT oversaturate when applying the cleaning solution.
5. Work the solution into the affected area by lightly scrubbing the area with a sponge or soft bristle brush. Make sure to work from the outside of the stain inwards so as not to spread the stain. Also rinse your sponge or brush frequently.
6. Allow cleaning solution to soak for 10 minutes.
7. Rinse thoroughly to remove all bleach residue from the fabric.
8. Allow fabric to air dry.

Extraction cleaning, for medium, ground-in stains and overall yearly maintenance

For overall cleaning, we recommend periodically extracting upholstered surfaces using hot water extraction.

Please note that no fabric is indestructible. Stains such as permanent marker, lipstick, nail polish, etc. may not be completely removable.
