

BPC-157

Muscle, Joint & Gut Support*

BPC-157 is predominately indicated for patients who need joint and/or digestive (upper/lower) support.

There are two dosages available: a 250 mcg dose, ideal for patients needing maintenance; and a 500 mcg dose, a higher potency that can be leveraged as a loading dose or applied to cases where more support is needed.

There are two time-release formula options: rapid and delayed. The rapid release formula is typically for upper GI application. Regarding joint health, rapid release is more appropriate for acute needs, while the delayed release works for more ongoing support. The delayed release formula is intended to reach the lower intestines without succumbing to the harsh environment of the upper digestive system.

Historically, peptides have been notoriously difficult to absorb orally. Throughout the entire BPC-157 line, it is important to note the addition of Salcaprozate Sodium (SNAC), which works to enhance absorption and support the body's ability to utilize the desired serving dosage at the required time.

DEMOGRAPHIC & CLINICAL APPLICATIONS

MEN & WOMEN

PATIENTS REQUIRING

- Digestive Support; Both Upper & Lower
- Musculoskeletal Support
- Gut Brain Axis Protocols
- Immune System Support

BENEFITS

Joint and Soft Tissue Support

Promotes Digestive Function

Neurological Support

Endothelial Nitric Oxide Production

DIRECTIONS:

Take 1 capsule twice daily or as directed by your healthcare practitioner.

SUPPLEMENT FACTS

Serving Size: 1 Capsule | Servings Per Container: 60

	Amount Per Serving	%DV
Body Protective Compound (as BPC-157 Arginate Salt)	500 mcg	*
Salcaprozate Sodium (SNAC)	3 mg	*

* Daily Value Not Established

Other Ingredients: Rice Powder, Microcrystalline Cellulose, Vegetable Capsule (Hypromellose)
