

SENOLYTIC

AVAILABLE IN 30 CAPSULE BOTTLES

RESEARCH

As we age, many of our cells pause themselves. They do this because they often sense some damage. The damage could be too much sun, abnormal chemicals in food and water, DNA damage, or many other types of insult. These cells are being studied for senescence - or this cellular pause mechanism - because they don't want to proliferate and cause their problems to expand such as what happens in cancer. Instead, they decide to wait for something in the body to help repair it or what caused the damage.

While in this stage though, they also try to signal to the body that they are unhealthy and need to be fixed. As a result, they secrete many inflammatory chemicals which cause more and more inflammation. This in turn can affect cellular processes in an inefficient way. The term for this is called inflammaging.

Inflammaging is believed to be a highly significant risk factor for both morbidity and mortality in elderly people, as research has shown that age-related diseases have been associated with inflammatory pathogenesis. Research shows that senolytics can help the body to cause these cells to go under apoptosis and limit the inflammation. Senolytics provide support to the body to stop this process.

DESCRIPTION

Senolytic are a class of substances which play a role in ridding the body of senescent cells - the healthy way (apoptosis). It uses natural antioxidants found in healthy foods to seek out senescent cells and safely get help get rid of them. Senolytic help the body avoid necrosis, and thereby help ensure that dying cells don't remain in the body, where they can do harm. Think of Senolytics as supporting the body's internal shield, protecting from inflammaging! Fisetin, quercetin and curcumin have been recognized as some of the more important senolytics among food supplements.

NUTRITION

Supplement Facts		
Serving Size: 1 Capsule Servings Per Container: 30		
Amount Per Serving		%DV
Fisetin (<i>Rhus succedanea</i>) (Stem)	100 mg	*
Quercetin (<i>Sophora japonica</i>) (Bud)	400 mg	*
Resveratrol (<i>Polygonum cuspidatum</i> Sieb.) (Root)	50 mg	*
Pterostilbene (<i>Pterocarpus marsupium</i>) (Wood)	50 mg	*
Curcumin (Turmeric Root)	50 mg	*
* Daily Value Not Established		
Other Ingredients: Veggie Capsules (Hypromellose, Titanium Dioxide)		

Directions: Take 1 capsule daily with water.
