

SUGGESTED FORMULA

PROGESTERONE 200MG SUPPOSIBASE CAPSULES SIZE #0

Version number: 1.0

Volume or quantity 100 CAPSULES

PROGESTERONE USP MICRONIZED	22 G
SILICA GEL (PPTD) MICRONIZED	2 G
SUPPOSIBASE	30.17 G

SUGGESTED COMPOUNDING PROCEDURES

1. Melt Supposibase at 35° - 40°C.
2. Mix powders into the melted base, keep temperature at 40°C.
3. Set capsules in filling machine and keep capsule tops separately in the machine plate.
4. Pour into empty capsules and allow to solidify at room temperature.
5. Set plate with capsule tops on bottoms, connect and snap capsules in place, per SOPs.
6. Suggested quality assessments:
 - a. % variability & % deviation from theoretical <10% - (remake if >10%)
 - b. Capsule size
 - c. Capsule color
 - d. Label - auxiliary labels, storage, BUD, compounded medication

Store in air-tight container, Refrigerate

Formula allows for 10% waste

Note: No claims are made as to the safety or efficacy of this preparation. This formulation is provided solely at the unsolicited request of the pharmacist.

Note: Beyond-Use Dates of preparations are conservative estimates by the formulator using reference books, peer-reviewed literature, intended duration of therapy, formulation from commercially available products, organoleptic observations and current USP guidelines. Compounders may have stability studies performed by a reputable laboratory if they wish to extend the Beyond-Use Date. It is recommended that you follow USP <795> recommendations for potency testing.

Beyond-Use Date is estimated to be 180 days.

Precautions:

Precautions should be taken when compounding with hormones and other steroids, as they can be absorbed through the skin, mucous membranes and lungs. Wear appropriate personal protective equipment. Use vented safety closures when weighing and mixing compounds to prevent exposure to the compounder. Pregnant women and personnel with hormone related cancers should not compound hormone formulas.
