

How to use your Mini Potion kit

Our Mini kits are a great way for kids to learn about playing potions, about exploration, investigation, cause and effect and imaginative thinking. It's a great way to practice important skills such as scooping and pouring. Each kit has a different theme and the ingredients on the back of the card give a small story about each ingredient to inspire creative play and imaginative ideas. Make a soup, an elixir, a witches brew, the possibilities are endless!

- Add a small amount of the fizz (dry ingredient) to a bowl.
- Slowly add some liquid from your bottle.
- The refill powder is used to refill the bottle for little hands that love to pour. Use a small amount ($\frac{1}{2}$ teaspoon) in the bottle and fill with water. You can always add more water to your potion for further play.
- Adventure out into the garden and collect nature finds to add to your potion.
- Bottle up your potion and use it to make more potions! Just remember that natural elements may start to go mouldy if you leave them too long.

We hope you love making magic with this kit. What magic are you creating today?
