

Make your own...

SEAL MASK

1. Draw your own seal head shape on card or print this mask
2. Decorate the front of your seal mask
3. Carefully cut around the edge of your mask and cut the eye and ear holes out (ask an adult for help if needed)
4. Thread string through the 'ear' holes and measure it to the size of your head
5. Tie the string behind your head

1. Draw your own sand eel shapes **or** print this sheet
2. Decorate your sand eels - can you decorate them all differently?
3. Carefully cut along the edge of each sand eel
4. You should end up with 10 beautiful sand eels!

PLAY: Seals and eels

INSTRUCTIONS

1. **Player 1** hides the **sand eels** around while player 2 doesn't look.
2. **Player 2** (wearing their beautiful new sealy mask) has to 'hunt' or **find the hidden sand eels**.
3. Player 1 could use '**hot**' or '**cold**' instructions to tell **player 2** when they are getting **closer** (hotter) or **further away** (colder). Or not it's up to you!
4. After player 2 has found the sand eels, **swap around!**
5. **If that's easy** - you could make some more sand eels and see how many sand eels you could each find in 5 minutes.
6. Now try **making your own game** with the mask and sand eels!

EXTRAS

1. Research about how seals dive and try to find out what happens to their bodies when they dive.
2. Make up a story about the seal in your game.

DID YOU KNOW:

-  Grey seals have 42 + pairs of whiskers, which they use to find sand eels
-  Grey seals have white pups that we call 'white coat pups'. White coat pups don't eat sand eels, they drink milk for the first 3 weeks of their life
-  Seals can sleep in the water to digest their fish dinner. They sleep vertically upright and when they run out of oxygen their back flipper twitches, rising them up to the surface to take a breath
