CHIME KIT
SCK6203

INCLUDES:

1 Chime

1 Lit Button / 1 Unlit Button

1 16 Volt - 10 Watt Transformer

INSTRUCTIONS

EASY TO INSTALL

Chime Kits for home or business use. Contains everything needed for new systems or to replace existing systems. Distinct 2-note front door (Ding-Dong) and 1-note rear door chime sound (Ding).

Mount Push Buttons and run the low voltage wire as shown in the instruction diagram.

Position Chime in desired location. A central location is preferred. Turn off power and install the Transformer at a handy electrical junction box. Make the electrical connections, check all connections, turn on the power. Your system is ready for operation.

No maintenance required. The pleasant sounding chimes provide years of uninterrupted service.
