HELPS SUPPORT ANKLE & FOOT

Swede-O® Pediatric Walking Boot helps immobilize the ankle and is ideal for severe ankle sprains, stable ankle fractures, post surgery, and post cast recovery. Studies¹ show that bearing weight on a stable injury helps facilitate recovery, allowing the patient to return to normal activity at a faster rate.

Designed with a non-slip rocker bottom and low profile heel to promote natural gait. Shock absorbing, closed cell foam insole and heel cushion absorb and dissipate the impact of heel strike when walking. A wide footbed provides increased stability and accommodates for edema and bandage while a deluxe foam liner provides comfort.

Swede-O Pediatric Walking Boot is durable, lightweight, and includes fitting pads to accommodate extra space around the ankle, heel, or leg.

SPECIFICATIONS

Product Selection: Swede-O® Pediatric Walking Boot, Gray UTL-1132

Product Weight: .8 lbs

Short Dimensions:

Small: 7.5" x 6"

Medium: 8.5" x 7"

Large: 10" x 8"

XLarge: 12" x 9"

Materials: pvc vinyl, polyethylene

Case Quantity: 3

Case Dimensions: 12" x 8" x 10"

Case Weight: 4 lbs

Latex: This product is not made with natural rubber latex

Country of Origin: Made in Vietnam

California Residents Only:
