- Plush surface slowly releases cold therapy for subacute injuries
- Soft surface quickly releases cold therapy for acute injuries

Available From:

SOFT, COMFORTABLE & VERSATILE

The versatile design of the Clover Pack™ comfortably surrounds painful, inflamed joints with cold therapy. Get long lasting, drug free relief by applying mild compression using the adjustable strap to secure the cold pack to the injured area.

The pack's exterior is made of a proprietary blend of synthetic fibers and organic plant materials. The plush fabric slowly releases cold therapy for subacute injuries while the soft surface quickly releases cold therapy for acute injuries. The nontoxic, biodegradable fill in this pack stays soft and pliable when frozen.

The frost free pack is soft to the touch and gentle on the skin; does not need to be wrapped in a towel. Simply store the pack in the freezer for a minimum of 1 hour prior to use; the pack will remain cold for 20-30 minutes.

SPECIFICATIONS

Product Selection: Clover Pack™ Cold Compression Therapy Pack ACC-556

Product Weight: 2 lbs

Dimensions:
Pack: 11.5" x 11.5"
Strap: 4" x 34"
