### VERSATILE & COMFORTABLE

Dual Comfort CorPak™ Hot or Cold Therapy Jaw Wrap provides a versatile solution to help relieve headaches, ease pain, and help reduce inflammation associated with wisdom teeth removal, TMJ, postoperative, sinus or dental pain, and migraines. Conveniently store pack in the freezer for cold therapy the moment you need it! This pack stays soft and flexible, comfortably contouring to painful areas. Use cold to ease pain and help reduce inflammation; warm pack in the microwave to aid muscle relaxation and promote healing.

Adjustable strap provides compression and secures the pack to the injured area while keeping hands free for daily activities. The Jaw Wrap contains nontoxic, biodegradable fill to retain cold and heat longer.

The soft, frost free pack is gentle on skin and does not need to be wrapped in a towel. For cold therapy, place pack in freezer for a minimum of 1 hour prior to use. For heat therapy, simply heat the pack in a microwave according to the heating instructions printed on the pack. The pack will maintain therapeutic temperature for 20 minutes. When not in use, the pack may be stored in the freezer for convenience.
