

SWEDE-O® NEOPRENE TENNIS ELBOW SUPPORT

- Relief for tennis elbow, golfer's elbow, and tendonitis
- Helps reduce forearm strain due to repetitive use injury
- Integrated foam pad applies targeted pressure to ease pain
- Easy to apply and adjust
- Comfortable support and compression through full range of motion
- Retains natural body heat to promote healing

Available From:

COMFORTABLE ELBOW SUPPORT

The Swede-O® Neoprene Tennis Elbow Support helps relieve muscle and elbow joint pain associated with golfer's elbow, tendonitis, lateral epicondylitis (tennis elbow), repetitive stress injuries, and supinator muscle strain while maintaining full range of motion. Use this support to apply targeted compression to the upper forearm.

The contoured design provides optimal compression over affected tendons while adjustable strap relieves strain of the overworked tendon. The strap offers easy application and adjustment. The material is soft and comfortable against the skin; bilateral design fits right or left elbow.

Neoprene Construction provides warmth to promote healing and ease pain. Wear only during activity.

SPECIFICATIONS

Product Selection: Swede-O®
Neoprene Tennis Elbow Support
ELB-6505

Product Weight: .1 lbs

Dimensions:
Small: 9.625" x 3"
Medium: 10.625" x 3"
