- Designed by a physical therapist specializing in women's health
- Contours to the waist and hips for comfort

Available From:

EASES PAIN AND PROVIDES COMPRESSION

The Better Binder™ Abdominal Support helps ease pain and provides compression to assist weakened core muscles after surgery, C-section, or postpartum. This support can also be used to wrap the abdomen after delivery for tummy reshaping.

The wraparound design is easy to apply; simply adjust two independent straps to help increase or decrease the level of support. Comfortable lower strap gently lifts the lower belly while upper strap provides support to the abdomen. Latex-free, durable elastic material contours to the natural shape of the body for comfort during active use. Low profile design is discreet under clothing.

The Better Binder was developed by a physical therapist specializing in women's health, and is recommended by doctors, nurses, physical therapists, midwives, childbirth educators, massage therapists and, most importantly, moms.
