- 2.00 mm
- Dual bevel
- Smooth penetration
- Promotes a self-sealing wound
- Facet-free
- Natural diamond
- Cutting edge of exquisite sharpness

6-20/6-092

Rounded shape of the blade and its consistent sharpness facilitate flap dissection, minimize the risk of injury of the ciliary body while the opening of Schlemm's canal is performed, eliminate tissue drag and distortion.

The blades are made of natural diamond. Special technology allows to produce a cutting edge of exquisite sharpness.

- Ergonomic handle is made of titanium which is preferred for its lightness, non-corrosive and non magnetic features.
- Locking mechanism for blade safety.
- Overall length - 130 mm.
- Lifetime warranty against manufacturing defects.
- All RUMEX Diamond Knives are supplied in free sterilization trays of the appropriate size.
- Maintenance service.
