

# HOW TO *aeropress*

1. Fill Kettle & bring to boil
2. Place filter in black portion of aeropress, & wet with boiling water to minimize any papery taste
3. Using the scoop that came with your Aeropress, add one & a half scoops of coffee to your grinder (to yield a heaping scoop when ground) & grind until fine
4. Twist the filter cap onto the chamber, & place on your mug of choice
5. Add a heaping scoop of coffee to the chamber, then gently shake Aeropress to level
6. Pour boiling water to the 1 marker, and stir for 10 seconds
7. Insert plunger and press gently, until a soft hissing sound can be heard; carry Aeropress to trash, remove filter cap, & push plunger to eject coffee and filter
