Waveband Communications was founded in April, 2002 to custom engineer and deliver products that better service two-way radio accessory needs. We’re proud of our products, services, warranties, performance and reputation. Here are product and performance comments from customers who actually use and purchase Waveband Communications Two-Way Radio Accessories.

"Exceptional product! Excellent customer service and delivery. We are a Motorola two-way dealer and sometimes need a source for our customers to fill their orders for other brands. I always search for family or U.S. Military/Veteran managed and operated businesses to purchase from because that is what we are. We highly recommend Waveband Communications for all your radio accessories. Hooah!" (Mike H.)
