Waveband Communications was founded in April, 2002 to custom engineer and deliver products that better service two-way radio accessory needs. We're proud of our products, services, warranties, performance and reputation. Here are product and performance comments from customers who actually use and purchase Waveband Communications Two-Way Radio Accessories.

"I previously purchased this microphone about 3 years ago to use with my portable radio. I work as Train Operator in the SF Bay area and we experience all the seasons, this mic has performed well through rain, heat, cold and being dropped many times and the only thing to stop my using it is a thief broke into my car and stole it. I am purchasing another one and this time I won’t leave it my car. The Waveband Comm. crew were very helpful with tech info so I could determine the best fit. Excellent product and I recommend it highly."
