Waveband Communications was founded in April, 2002 to custom engineer and deliver products that better service two-way radio accessory needs. We’re proud of our products, services, warranties, performance and reputation. Here are product and performance comments from customers who actually use and purchase Waveband Communications Two-Way Radio Accessories.

"Our agency orders these from Waveband Communications in various different quantities. We issue one with every radio and shoulder MIC we give out. Our guys in the field enjoy using them especially with the wireless shoulder Mics. I get others wandering in and tell me they noticed their partners wearing them and always inquire about how they can get one. Great product, can't go wrong with the Waveband WV1-10282" (Guest)
