

Two-Way Radio Maintenance Weekly Checklist

TWO-WAY RADIO

- Inspect radio buttons and keypad
- Lightly dust any dirt or debris covering the speaker
- Check the LED Screen for any damage
- Check the volume and channel knobs on the top of the radio.

ANTENNA

- Inspect the antenna for any bending

BATTERY

- Inspect the battery for any cracks or acid leakage
- Look at the gold-plated contacts. Gently wipe down the contacts with a microfiber cloth.
- Check battery date code for age and warranty.
- Using a compatible charger

BELT CLIP

- Check for cracks or damage
- Ensure screw is tight and sturdy

CHARGER

- Lightly dust the inside of your charger cups with a feather duster or cloth to pick up any dust or debris.

AUDIO ACCESSORIES

- Inspect cables. Do you see any fraying or exposed wires?
- Check the connector. Are there any loose or missing pins?
- Look at the clear acoustic tube for any wax build-up or moisture. If so, clean out the acoustic tube.
- Gently run a feather duster to collect any debris or dust inside the speaker or push to talk component.
