

WV-6037-LIP Battery

Rechargeable battery for
Motorola®
XTS 3000/5000 Radios.
Replaces OEM NTN8610BR

Features

- Powered by Waveband Lithium Polymer technology.
- Extends operating time and reduces the total number of batteries needed.
- Rated for 850+ charge cycles, maintaining at least 80% original rated capacity.
- Provides excellent discharge characteristics.
- Holds 80% charge for 6 months off the charger for use in emergency operations.
- Contains minimal high quality cells for minimum impedance.
- Rigorous testing including temperature, vibration, shock, drop, short circuit, and overcharge.
- Sequential serialization used on battery labels.

Cell Specifications

Cell Manufacturer: SANYO

Chemistry: Lithium Polymer

Voltage: 7.4 VDC

Operating Temp: -20° to 60° C

Special Features of WV-6037-LIP

- ✓ **Compatible with Motorola Impress chargers, but does not engage conditioning mode.**
- ✓ **Uses Charge Cycle Chip that provides critical battery data on XTS Series radios and Motorola Impress Chargers and Readers.**
- ✓ **WV-6037-LIP is a lightweight, high performance alternative to traditional battery chemistries. With longer talk times, higher capacities, and extended life, WV-6037-LIP is the ultimate solution for improved performance.**

About us Waveband Communications is a trusted leading manufacturer of two way radio accessories Waveband designs manufactures, and tests radio batteries and audio accessories that are critical for first responders, military, security and commercial users.
