Fighter® was established in 1998 in Czech Republic, **Europe**. It is now a world recognized brand. Except Europe also in the **USA** or **Latin America**.

In addition to the development of traditional products, we bring to the market completely new products for the combat training.

Thanks to having our production partly located in the Czech Republic, we are able to significantly accelerate development. Our partners, coaches and professional athletes, help us to constantly improve our products.

All products from this catalog are designed by our team in the Czech Republic.

For actual offer and prices of Fighter® products visit: www.fighters-inc.com for the USA www.fighters-europe.com for Europe

BOXING GLOVES **SIAM**

The glove padding is firm, made from a one-piece injection mold, far superior to a layered foam. These Muay Thai gloves also have additional padding. The wide cuff is padded in the back as well as front. Extra padding extends into the palm for increased support and added defensive protection.

- *Perfect for combat arts, cardio fitness, or any boxing training*
- *Durable construction and long-lasting durability*
- *Comfortable wear with secure wrist strap*
- *Firm and evenly padded - one-piece molded glove*

LARGE KICKING & PUNCHING **SHIELD**

This shield is ideal for punches and kicks training with a partner. The trainer can simulate real fighting movements much better than a traditional heavy bag. The shield is perfectly filled with reinforced material, which absorbs full-force and full-speed strikes. In addition, the shield is washable and made of highly durable materials.

- **Durable materials, vinyl, hardened foam**
- **70 cm x 60 cm x 15 cm**
27½" x 23½" x 6"

FKPS-01

FIGHTER BODY SHIELD

You can use this Fighter big body kick shield with a sparring partner, but you can also use it solo as it can be strapped to use on a tree, pole, rail or anything else. You can use it solo on the ground to practice punches as they need to be thrown in MMA or self-defense.

You will effectively practice various combinations thanks to the small, numbered targets.

Another advantage is the shape of the human body, which makes it

easier to learn how to aim for kicks and punches. The entire shield is about 4 kg (8.8 pounds) only so any manipulation is easy and quick.

- **Durable materials, vinyl, hardened foam**
- **Small, numbered targets for precision and combinations training**
- **70 cm x 45 cm x 15 cm
27½" x 17¾" x 6"**

TRAINING **POWER WALL**

Power Wall. A revolutionary product that you can use in the gym and also at home. It is one of the most universal training systems on the market, developed and produced in Europe! Thanks to its variability, everyone can build their own training. The base of the power wall is made of four solid boards covered with high-quality velcro. It guarantees long service life. The board is the only thing that needs to be attached to the

wall. The board can be attached on the wall according to your needs. We recommend to shape the boards to one big square. The bottom line of the board should be about 60cm above the floor. This shape guarantees that the wall could be used for small kids and also at the same time for adults. When you have the boards attached to the wall you can place the shields and mitts wherever you want and make a good

placement for your technique or combination. The mitts and shields are made of durable and washable material and equipped with velcro all over the back side which can be very easily attached to the Power Wall boards. Use the mitts and shield to make your training enjoyable. We recommend the combination of small round targets for reaction training. The dummy shield can be used for all differ-

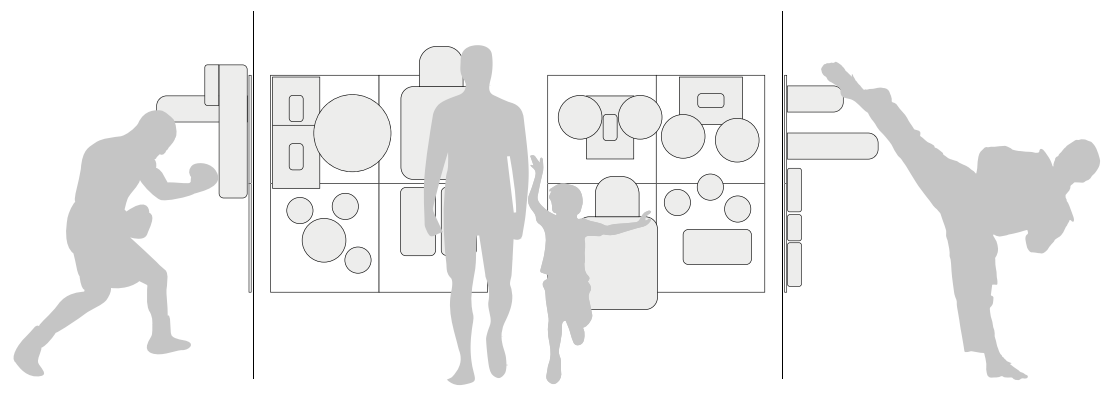

ent techniques such as punches, jabs, uppercuts, hooks but also for the snap round-kicks. There are simply no limits to your imagination! Power Wall is completely designed and manufactured in Europe, the Czech Republic. The materials come from Europe and are carefully selected and tested.

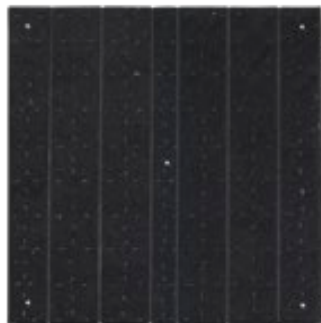

- *Made in Europe*
- *Quality materials*
- *Easy installation*
- *Trouble-free maintenance*
- *Endless combinations*

- **Height 170 cm (67")**
- **Weight: ~37 kg (81½ pounds)**
- **Base diameter 44 cm (17¼"), bag 20 cm (8")**
- **Made in Europe**

Video

FREE-STANDING BAG **UNIVERSAL 3in1**

The universal free-standing punching bag Fighter 3in1 brings completely new training experience. The concept is designed for the maximum possible use, both in the gym and at home. It is great for practicing various combat sports and martial arts from boxing and kick-boxing to karate or taekwon-do.

The main function is to use it as a free-standing bag. Because the most of the weight is at the bottom, the bag gives you great feedback after punching or kicking.

When you are ready to practice stand up techniques - take out of the base and start something completely new. With no base the bag stands itself so you can easily have it ready for practicing take downs, throwing or ground & pound.

When you miss the classical heavy bag, all you have to do is unpack the straps, hang the bag and you can start practicing. The bag is not as heavy as the regular one but because of the weight on the bottom it still gives you excellent workout. The base is already filled from

factory. Thanks to the weight of the base (approx. 83 pounds, 38 kg), the bag is very stable. There is additional velcro on the bottom of the bag and inside of the base. This ensures sufficient attachment of the bag to the base. At the same time, with 4 integrated handles, you can easily carry the base and use the bag on different places.

The coat of the bag and the base is made of a very durable Hitex Polyplan from Austria. This material is also very easy to maintain. The bag's filling is made of several lay-

ers. Closest to the coat is the Trocellen PE from Italy. Below is PUR HD from the Czech Republic and the core is made of recycled rubber crumb. The base is supplemented by sand. Thanks to these materials, the bag can also be used outdoors. However, the maintenance instructions must be followed!

The whole bag was developed in the Czech Republic in cooperation with athletes from various martial arts disciplines. Bag is also made in the Czech Republic.

- *3in1: free-standing bag, dummy and hanging heavy bag*
- *Suitable for the gym and home*
- *Easy handling*
- *Easy to wash*
- *Durable material*
- *Height ~ 5 ft 7 in (170 cm)*
- *Weight: base ~ 83 pounds (38 kg), bag ~ 50 pounds (23 kg)*
- *Made in Europe*
- *Suitable for outdoor use (see maintenance instructions)*

EXTENDER FOR BOXING BAG

Attach the extender to the boxing bag and fasten with velcro straps. Then attach Arm Targets or Mini Target from Power Wall. You can combine them to fit your training. Each of your training can be unique! The extender is equipped with the highest quality Velcro on the market, which is guaranteed to last at least 10,000 tear-offs.

- *Suitable for Arm Targets and Mini Target*
- *Velcro height: 40 cm (15¾")*
- *Bag ø 32 cm - 40 cm (12½" - 15¾")*

EXTENSION FOR BOXING BAG

Attach the Extension to the boxing bag and fasten with four straps. Then place the Extender and Arm Targets or Mini Target. You can combine them to suit your workout. There are no limits to your imagination!

- *Suitable for Arm Targets and Mini Target from Power Wall*
- *Height: 70 cm (27½")*

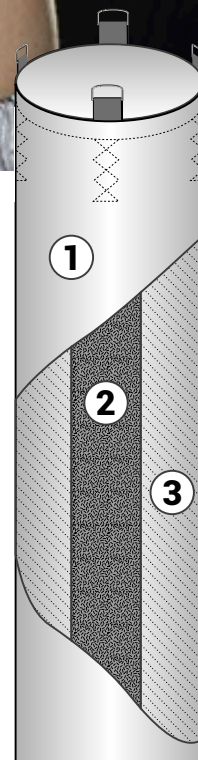

HEAVY BAG FIGHTER

The innovative design of the Fighter bag prevents material from settling or uneven hardness. The bag consists of a flexible core (2), which is covered with high density foam (3). The granulate is adapted to better absorb blows and kicks, so the bag is very gentle on the joints on the hands and feet. The innovation of the Fighter bag also lies in the straps that are sewn from the inside, so it is possible to use the entire surface of the bag for training without restrictions. The bag cover is made of high-quality Korean

synthetic leather (1). This material is strong, flexible and pleasant to the touch. Its maintenance is easy. The bag includes an extra package of granules. During the first days of training, the bag „sits down“ a little, so it is necessary to add granulate on top to allow the bag to be used along its entire length. The bag is supplied with chains and round spacers. The bag will be usable along its entire length and there will be no bruising around the chains and on the bag as such.

- **Uniform hardness**
- **Gentle on knuckles**
- **Usable along the entire length**
- **Filled with recyclable material**
- **Korean synthetic leather**
- **Round spacer and chains in the package**

ADJUSTABLE WALL TARGET **DUO**

Adjustable wall punching target, can be moved into different positions by long adjustment slides.

- *Made of vinyl*
- *Adjustable upper and lower part*
- *Made in Europe*
- *Dimensions of targets:
60x60x20 cm
23½" x 23½" x 8"*
- *Length of construction:
170 cm (5'10¾")*

1108SD

SPACER FOR CHAINS

The 4-sided spacer is the perfect complement to the boxing bags, where the filling material is slid and the top of the bag does not hold the right shape.

- *Solid steel construction*
- *Easy to install*
- *Production in Europe*
- *Galvanized surface treatment*

439

DUMMY STRAPS

It is an easy way how to turn your training dummy to personal boxing bag.

- *Easy velcro closure*
- *Made in Europe*

DS-01

WALL PUNCHING TARGET

Wall punching target, made of artificial leather. Ideal for boxing techniques. Hardware included.

- *Dimensions*
60x60x20 cm
23½" x 23½" x 8"
- *Made of vinyl*

1108

ADJUSTABLE WALL TARGET

Adjustable wall punching target, can be moved into different positions by 110cm long adjustment slides.

- *Dimensions*
60x60x20 cm
23½" x 23½" x 8"
- *Made of vinyl*

1108S

BOXING PLATFORM

Professional boxing platform for speed balls. The horizontal board is made of 4 cm (1½") thick massive wood. The diameter of the board is 65 cm (25½"). The platform is height adjustable.

- **Steel construction**
- **Wooden platform**

1121

SPEEDBALL PLATFORM

Wooden platform with adjustable steel brackets.

- **Steel construction**
- **Wooden platform**
- **Diameter: 60 cm (24")**
- **Height: 50 cm (20")**

439

HEAVY BAG WALL HANGER

Ideal 78 cm (30¾") length allows full 360-degree access around bag when working out. Can be mounted masonry wall. Extra sturdy and strong. Holds bags up to 70 kg (154 pounds). Super sturdy, strong and easy to install.

- **Steel construction**
- **Height: 78 cm (30¾")**
- **Width: 30 cm (11¾")**
- **Arm length: 75 cm (29½")**
- **Holds up to 70 kg (154 pound)**

Steel - 08001-z,
Black - 08001-blk

SPEEDBALL PLATFORM

This professional speed ball platform can be mounted securely to concrete walls as well as to 16-inch spaced wooden stud walls. Once mounted, the bag can be raised or lowered to a desired height.

- **Steel construction**
- **Wooden platform**
- **Diameter: 60 cm (24")**
- **Height: 50 cm (20")**

439-AN

BOXING BAG SPRING

Heavy Bag Spring is recommended for all hanging heavy bags. Helps eliminate noise and stress on mounts.

- **Steel construction**
- **Holds up to 80 kg (176 pounds)**

472

BAG HANGER

An ideal way to hang a heavy bag from ceiling. Made of heavy-duty steel with rugged eye bolt for attaching heavy bags up to 80 Kg (176 pounds).

- **Steel construction**

5551

WORK STATION

- **Steel construction**
- **Up to 3 heavy bags**
- **Speedball platform included**
- **Height: 250 cm (8'2½")**
- **Arm length: 80 cm (2'7½")**

F4111-01

TATAMI MINI

Tatami developed especially for home use. Its dimensions are designed to fit with your home. When you don't use it, you simply stack it. It only takes half a square meter of space.

Thanks to its compact dimensions, it is also much easier to transport it where you need it. Of course, the price of shipping is lower.

What hasn't changed is quality. Excellent damping properties, anti-slip treatment and easy hygiene are the features that rank it among professional equipment.

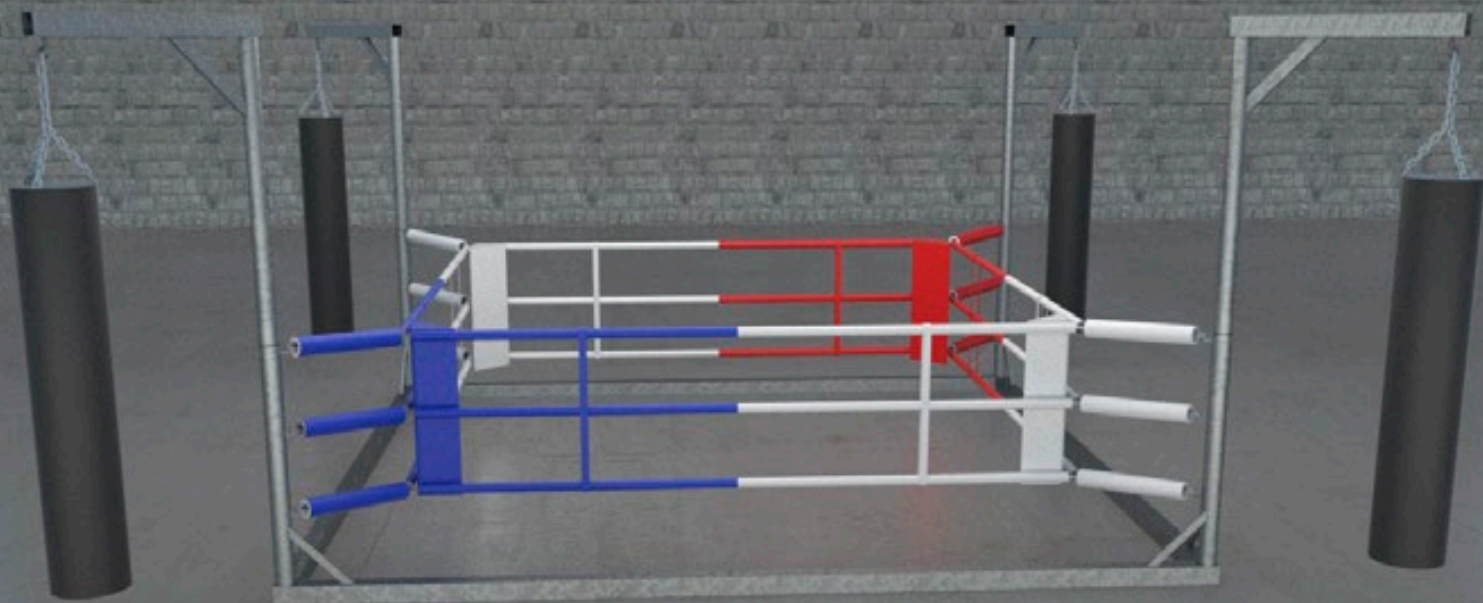

- **thickness: 2.2 cm (0.87")**
- **surface: pattern of traditional rice tatami**
- **safety: Tested according to European standard EN 1177**
- **the surface is washable, impermeable, antibacterial and hypoallergenic**
- **Size 50 cm x 50 cm (19.7" x 19.7")**
- **made in Italy**

FREE-STANDING TRAINING RING

This unique training ring is designed and fabricated in Europe. Free-standing structure made of galvanized steel that is design to be cantilevered against itself once the ropes are attached and tightened. No drilling required. The minimal connection construction allows for a fast build-up and dismantling without losing strong ring stiffness. By far the best ring for competitions and everyday training.

BJJ GI PEARL WEAVE

This Fighter BJJ modern model blends fabrics differently for the top and bottom. The top is a made of a one-piece, traditionally thicker, durable, cotton fabric with a densely woven 450 gsm Pearl Weave. It has softer inside lining made of polyester to reducing chaffing.

The bottom is a Ripstop. This fabric is a breathable, cotton canvas reinforced with stitching. Together, this combination is lighter and more comfortable to wear without compromising

durability and uniform performance. This uniform meets all the requirements for training and competition. It is a perfect choice for athletes participating in major international tournaments under the IBJJF rules.

- **Inside lining to reduce chaffing**
- **Durable Ripstop fabric used for the pants**
- **High-quality embroidery and stitching**

BJJ GI RIPSTOP

The Fighter Ripstop BJJ Uniform highlights the latest improvements in construction and fabrics. It is ideal for competitors needing to make a weight division during BJJ competition, where they are weight-checked while wearing uniforms.

It is also a perfect choice for athletes training on hot days when a lighter uniform is preferred. The fabric is a breathable, cotton canvas reinforced with stitching in

typically stressed areas. This makes the uniform a light-weight option for training, without risking durability. The top is one piece of fabric with regular collar thickness. Standard draw-string pants.

- **Ripstop fabric**
- **High quality stitching and embroidery**
- **Strong draw-string cord for waistband**
- **Slim cut**

BE UNIQUE!

CHOOSE YOUR PRODUCT - SELECT COLOR - ADD YOUR LOGO

Do you want your club/school to be unique and have the gear, uniforms, sport bags, and other products customized? Offering customized products with your school logo and in your club colors.

MITTS & SHIELDS

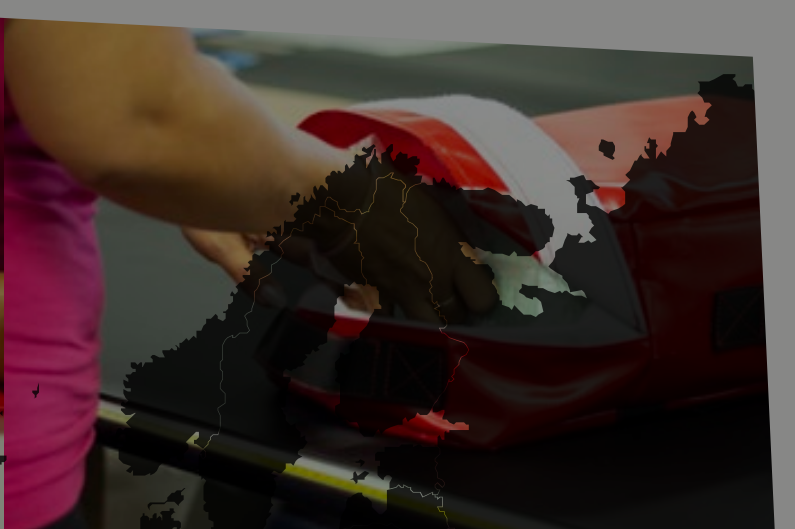

The numerous sizes of punch mitts correspond to their widely different use in training. Small ones are for punches and quick body work, big mitts cover the entire forearm and are suitable for leg work in Thai boxing.

SPORT BAGS

Equipment for combat sports such as boxing helmets, shin guards, etc. take up space; therefore, you need a high-quality bag for carrying it all around comfortably without getting ripped or damaged.
