NOTES:

1. Choose your size based on the measurements in the [Size Chart on page 3](#). The Finished Garment Measurements are for referencing ease in the garment only.
2. The finished FULL BUST measurement represents a target *negative ease* of approximately 10% of the FULL BUST measurement represented on the Size Chart.
3. The HEM measurement is the bodice circumference at the finished hem of the Tee, which is designed to fall approximately 8" (20 cm) below the natural waist. The finished HEM measurement represents a target *negative ease* of approximately 10% at the bodice HEM location.
4. BODICE LENGTH is measured from the center back neckband seam straight down to the finished hem on the Back Bodice of the Tee.
5. SLEEVE LENGTH is measured from the seam at the top of the sleeve cap/shoulder straight down to the finished hem of the sleeve. The short sleeve length is 1½" (3.8 cm) measured along the sleeve seam from underarm seam to the hem across all sizes.
6. The finished inseam of the VERSION A Pants is 28" (71 cm) across all sizes. The finished inseam of the VERSION B Shorts is 3" (7.6 cm) across all sizes.
7. The WAIST measurement shown represents the unstretched waist with elastic installed and is designed with minimal ease. The top of the finished waistband is designed to sit about 1" (2 to 3 cm) below the natural waist.
8. The PANTS HIP is measured approximately where the crotch curve meets the rise and this measurement may be less than your FULL HIP measurement if your fullest hip measurement falls below the designated pants hip location. This is to be expected and does not necessarily mean you need to size up.
