

## PCI Compliant Cardholder Policy

Services are provided by Australian Postal Corporation trading as Australia Post Mobile and Australia Post Broadband.

We are committed to ensuring the security of your credit card data. We use PCI compliant systems to ensure the integrity and security of your cardholder data. We are committed to the ongoing safeguarding of personal identification and payment information of everyone who shops or interacts with us.

### What is PCI-DSS?

The world's major credit card schemes (VISA, MasterCard and American Express) have introduced the Payment Card Industry Data Security Standard (PCI-DSS) which is a global information security standard applying to all organisations that store, transmit or process credit card information.

The new standards have been developed to help protect our customers, team members, and suppliers from fraud and identity theft by ensuring that credit card data is handled securely throughout all transactions and interactions.

### PCI Cardholder Partner and Compliance

Your credit card transactions are handled via [Shopify](#), [eWay](#) and NAB who are all PCI compliant and re-assessed annually. In addition we undergo an annual PCI compliance review as part of our PCI-DSS obligations.

For further information on what details we capture and how we handle your data, view our other policies on our website [australiapostconnect.com.au](http://australiapostconnect.com.au)
